Subject No. 51 /2018

Approval to the lecture and practical schedules of the subjects offered by the departments viz., Dairy Technology, Dairy Engineering, Dairy Chemistry, Dairy Microbiology & Dairy Business Management in the Faculty of Dairy Technology in accordance with 5th Deans' committee recommendations ......

It is to submit that the recommendations of 5<sup>th</sup> Dean's Committee of ICAR have been implemented in the Faculty of Dairy Technology, MAFSU, from the academic year 2016-2017. The lectures and practical schedule of newly adopted B. Tech (DT) syllabus in the Faculty of Dairy Technology of all departments are submitted for the perusal and approval of the Academic Council. (See ANNEXURE I, II, III, IV and V).

Hence the subject is submitted before Hon'ble Academic Council as per provisions of MAFSU, Act 1998, Section 30 (Power and duties of Academic Council.) (1) and (2).

ANNEXURE I
List of Courses offered by Department of Dairy Technology

| Sr. No. | Discipline and Title of the Course   | Credits Hours |
|---------|--------------------------------------|---------------|
| 1       | Market Milk                          | 4 (3+1)       |
| 2       | Traditional Indian Dairy Products    | 3 (2+1)       |
| 3       | Fat Rich Dairy Products              | 3 (2+1)       |
| 4       | Condensed & Dried Milks              | 4 (3+1)       |
| 5       | Cheese Technology                    | 5 (3+2)       |
| 6       | Ice-cream & Frozen Deserts           | 3 (2+1)       |
| 7       | By Products Technology               | 3 (2+1)       |
| 8       | Packaging of Dairy Products          | 3 (2+1)       |
| 9       | Sensory Evaluation of Dairy Products | 3 (2+1)       |
| 10      | Food Technology - I                  | 3(2+1)        |
| 11      | Dairy Plant Management               | 2 (1+1)       |
| 12      | Waste Disposal & Pollution Abatement | 2 (1+1)       |
| 13      | Food Technology -II                  | 3 (2+1)       |
|         | Total                                | 41 (27+14)    |

ANNEXURE II
List of Courses offered by Department of Dairy Engineering

| Sr. No. | Discipline and Title of the Course       | Credits Hours |
|---------|--|---------------|
| 1       | Workshop Practice                        | 2 (1+1)       |
| 2       | Fluid Mechanics                          | 3 (2+1)       |
| 3       | Engineering Drawing                      | 1 (0+1)       |
| 4       | Thermodynamics                           | 2 (1+1)       |
| 5       | Heat & Mass Transfer                     | 3 (2+1)       |
| 6       | Boilers and Steam Generation             | 2 (1+1)       |
| 7       | Basic Electrical Engineering             | 3 (2+1)       |
| 8       | Refrigeration & Air-conditioning         | 3 (2+1)       |
| 9       | Dairy Engineering                        | 3 (2+1)       |
| 10      | Dairy Process Engineering                | 3 (2+1)       |
| 11      | Instrumentation and Process Control      | 3 (2+1)       |
| 12      | Food Engineering                         | 3 (2+1)       |
| 13      | Material Strength & Dairy Machine Design | 3 (2+1)       |
| 14      | Dairy Plant Design and Layout            | 2(1+1)        |
| 15      | Energy Conservation and Management       | 2(1+1)        |
|         | Total                                    | 38 (23+15)    |

ANNEXURE III
List of Courses offered by Department of Dairy Chemistry

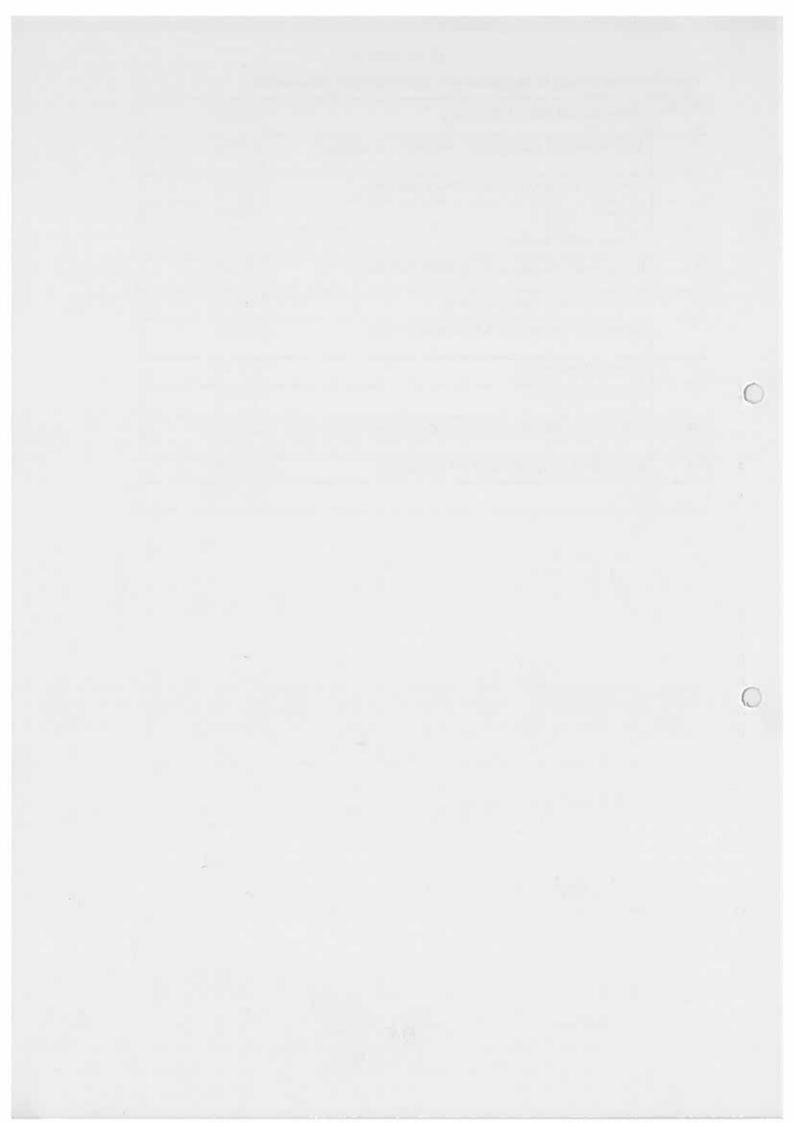

| Sr. No. | Discipline and Title of the Course | Credit Hours |
|---------|------------------------------------|--------------|
| 1       | Physical Chemistry of Milk         | 3 (2+1)      |
| 2       | Biochemistry                       | 2 (1+1)      |
| 3       | Human Nutrition                    | 2 (1+1)      |
| 4       | Chemistry of Milk                  | 3 (2+1)      |
| 5       | Chemistry of Dairy Products        | 3 (2+1)      |
| 6       | Chemical Quality Assurance         | 2 (1+1)      |
| 7       | Food Chemistry                     | 3 (2+1)      |
|         | Total                              | 18 (11+7)    |

ANNEXURE IV
List of Courses offered by Department of Dairy Microbiology

| Sr. No. | Discipline and Title of the Course              | Credits Hours |
|---------|---|---------------|
| 1       | Fundamentals of Microbiology                    | 3 (2+1)       |
| 2       | Microbiology of fluid milk                      | 2 (1+1)       |
| 3       | Microbiology of Dairy Products                  | 2 (1+1)       |
| 4       | Starter Cultures and Fermented Milk Products    | 3 (2+1)       |
| 5       | Quality and Safety Monitoring in Dairy Industry | 3 (2+1)       |
| 6       | Food and Industrial Microbiology                | 3 (2+1)       |
|         | Total   | 16 (10+6)     |

ANNEXURE V
List of Courses offered by Department of Dairy Business Management

| Sr. No. | Discipline and Title of the Course                      | Credits   |
|---------|---|-----------|
| 1       | Milk Production Management and Dairy Development        | 3 (2+1)   |
| 2       | Computer and Application Software Packages              | 2 (1+1)   |
| 3       | Economic Analysis                                       | 2 (2+0)   |
| 4       | Environmental Studies                                   | 2 (1+1)   |
| 5       | ICT in Dairy Industry and Operation Research            | 4(2+2)    |
| 6       | Fundamentals of Dairy Extension                         | 3 (2+1)   |
| 7       | Marketing Management & International Trade              | 2 (2+0)   |
| 8       | Communication Skills                                    | 2 (1+1)   |
| 9       | Industrial Statistics                                   | 2 (1+1)   |
| 10      | Entrepreneurship Development and Industrial Consultancy | 2 (2+0)   |
| 11      | Financial Management and Cost Accounting                | 3 (2+1)   |
|         | Total   | 27 (18+9) |

## ANNEXURE No. I

## List of Teaching / Lecture Schedule Department of Dairy Technology

|                | TEACHING    | SCHEDULE (Vth Dean) |                 |
|----------------|-------------|---------------------|-----------------|
| Course Title:  | Market milk | Course No.          | DT-301 (Theory) |
| Course Credit: | 4 (3+1)     | Semester            | II (V Dean)     |

| Lecture No. | Topics  | Date            |
|-------------|---|-----------------|
| 1.          | Market milk industry in India and abroad  |                 |
| 2.          | Distinctive features of tropical dairying as compared to those of the tropical climate of developed countries.  |                 |
| 3.          | Collection and transportation of milk   |                 |
| 4.          | Organization of milk collection routes  |                 |
| 5.          | Practices for collection of milk  |                 |
| 6.          | Preservation of milk at farm  |                 |
| 7.          | Natural microbial inhibitors in milk  |                 |
| 8.          | Lactoperoxidase system  |                 |
| 9.          | Reception and treatment (pre-processing steps) of milk in the dairy plant:<br>Reception, chilling, clarification and storage of milk  |                 |
| 10.         | Reception and treatment (pre-processing steps) of milk in the dairy plant:<br>Reception, chilling, clarification and storage of milk  |                 |
| 11.         | General practices of reception and treatment of milk  |                 |
| 12.         | Homogenisation: Definition, pre treatments, theories, synchronization of homogenizer with operation of pasteurizer (HTST)   |                 |
| 13.         | Homogenisation: Definition, pre treatments, theories, synchronization of homogenizer with operation of pasteurizer (HTST)   |                 |
| 14.         | Homogenisation: Definition, pre treatments, theories, synchronization of homogenizer with operation of pasteurizer (HTST)   | X 2 7 44 - 11 - |
| 15.         | Effect of homogenization on physical properties of milk.  |                 |
| 16.         | Bactofugation: Theory and microbiology  |                 |
| 17.         | Bactofugation: Theory and microbiology  |                 |
| 18.         | Thermal processing of milk  |                 |
| 19.         | Principles of thermal processing: kinetics of microbial destruction, thermal death curve, Arrhenius equation, D value, Z value, F value, Q <sub>10</sub> value  |                 |
| 20.         | Principles of thermal processing: kinetics of microbial destruction, thermal death curve, Arrhenius equation, D value, Z value, F value, Q <sub>10</sub> value  |                 |
| 21.         | Principles of thermal processing: kinetics of microbial destruction, thermal death curve, Arrhenius equation, D value, Z value, F value, Q <sub>10</sub> value; factor affecting on thermal destruction of m.o. |                 |
| 22.         | Definition and description of processes: Pasteurization   |                 |
| 23.         | Definition and description of processes: Pasteurization, thermisation, sterilization, UHT Processing  |                 |
| 24.         | Definition and description of processes: sterilization, UHT Processing  |                 |
| 25.         | Definition and description processes: Pasteurization, UHT Processing  |                 |
| 26.         | Product control in market milk plant  |                 |
| 27.         | Product control in market milk plant  |                 |
| 28.         | Defects in market milk  |                 |
| 29.         | Defects in market milk  | 1               |
| 30.         | Manufacture of special milks: toned, doubled toned, reconstituted, recombined   | 2               |
| 31.         | Manufacture of special milks: flavoured, homogenized, vitaminised and sweet acidophilus milk  |                 |
| 32.         | Manufacture of special milks: toned, doubled toned, reconstituted,  |                 |

|     | recombined   |
|-----|--|
| 33. | Manufacture of sterilized milk.  |
| 34. | Distribution systems for market milk.  |
| 35. | UHT processing of milk   |
| 36. | Relevance of UHT processing in the tropical climate  |
| 37. | UHT plants: Description. Direct, Indirect, with upstream and downstream homogenization, third generation UHT plants. |
| 38. | UHT plants: third generation UHT plants.   |
| 39. | UHT plants: Description. Direct Indirect, with upstream and downstream homogenization, third generation UHT plants.  |
| 40. | Aseptic packaging, types and systems of packaging  |
| 41. | Sterilizing packages, filling systems  |
| 42. | Technical control in the UHT plant   |
| 43. | Shelf life and tests for UHT milk.   |
| 44. | Nutritive value of milk.   |
| 45. | Nutritive value of milk.   |
| 46. | Effect of heat processing on nutritive value   |
| 47. | Cleaning and sanitization of dairy equipment   |
| 48. | Cleaning and sanitization of dairy equipment   |

|                | TEACHIN                       | G SCHEDULE (V <sup>th</sup> Dean)       |                        |
|----------------|-------------------------------|---|------------------------|
| Course Title:  | Market Milk                   |   | Γ-301 (Practical)      |
| Course Credit: | 4 (3+1)                       | Semester II                             | (V <sup>th</sup> Dean) |
| Practical No.  |                               | Topics                                  | Date                   |
| 1.             | Familiarization with equipm   | nents for reception of milk in plant.   |                        |
| 2.             | Familiarization with equipm   | nents for reception of milk in plant.   |                        |
| 3.             | Pretreatments: Chilling, clar |   |                        |
| 4.             | Pretreatments: Standardizat   | ion and numericals relating to it       |                        |
| 5.             | Pretreatments: Standardizat   | ion and numericals relating to it       |                        |
| 6.             | Cream separation: parts of s  | separator and the process.              |                        |
| 7.             | Operation of LTLT, HTST       | pasteurizer, laboratory steriliser      |                        |
| 8.             | Operation of LTLT, HTST       | pasteurizer, laboratory steriliser      |                        |
| 9.             | Preparation of special milks  |   |                        |
| 10.            | Preparation of special milks  | s; standardized milk                    |                        |
| 11.            | Preparation of special milks  |   |                        |
| 12.            | Preparation of special milks  |   |                        |
| 13.            | Cleaning of storage tanks     | s, cream separators, HTST plants; 1     | manual                 |
| 14.            | Detection of adulterants and  |   |                        |
| 15.            | Assessment of homogenisa      | tion efficiency in milk                 |                        |
| 16.            | Strength of common deterg     | ents and sanitizers used in market milk | plant                  |

|----------------|-----------------------------------|------------------|----------------------------|
| Course Title:  | Traditional Indian Dairy Products | Course No        | DT-302 (Theory)            |
| Course Credit: | 3 (2+1)                           | Semester         | III (V <sup>th</sup> Dean) |

| Lecture No. | Topics   | Date  |
|-------------|--|-------|
| 1.          | Status and significance of traditional Indian milk products in India                             |       |
| 2.          | Khoa: Classification, types, standards and definition  |       |
| 3.          | Methods of manufacture and preservation, factors affecting yield of khoa                         |       |
| 4.          | Mechanization in manufacture of khoa   |       |
| 5.          | Khoa based sweets: Burfi, Peda, Milk cake, Kalakhand, Gulabjaman and their compositional profile |       |
| 6.          | Manufacture practices of Burfi, Peda   |       |
| 7.          | Manufacture practices of Milk cake, Kalakhand, Gulabjaman  |       |
| 8.          | Rabri and Basundi: Definition, Standards & Product identification,                               |       |
| 9.          | Rabri and Basundi: Process description   |       |
| 10.         | Rabri and Basundi: factors affecting yield, physico-chemical changes during manufacture          |       |
| 11.         | Channa: Product description, standards and method of manufacture                                 |       |
| 12.         | Channa: packaging and preservation   |       |
| 13.         | Chhana-based sweets: Definition & Standards :Rasogolla, Sandesh,                                 |       |
|             | Rasomalai  |       |
| 14.         | Mechanization of manufacturing process of rasogolla  |       |
| 15.         | Mechanization of manufacturing process of sandesh  |       |
| 16.         | Mechanization of manufacturing process of rasmalai   |       |
| 17.         | Chhana-based sweets :advances in preservation &packaging   |       |
| 18.         | Paneer: Product description, standards   |       |
| 19.         | Paneer: method of manufacture  |       |
| 20.         | packaging and preservation   | 4     |
| 21.         | Mechanization of Paneer manufacturing/packaging process  |       |
| 22.         | Chakka/Maska: Product description, standards,  |       |
| 23.         | Shrikhand method of manufacture  |       |
| 24.         | small scale and industrial process of production   |       |
| 25.         | packaging and preservation aspects   |       |
| 26.         | MistiDahi: Product description   |       |
| 27.         | Mistidahi :method of manufacture and packaging process   | 3,000 |
| 28.         | Kheer and Payasam: Product description   |       |
| 29.         | Kheer and Payasam: methods of manufacture  |       |
| 30.         | innovations in manufacturing and packaging processes   |       |
| 31.         | Biopreservative principles in enhancing the self-life of indigenous milk products                |       |
| 32.         | Role of active packaging in enhancing the self-life of indigenous milk products                  |       |

| ecture<br>Io. | Topics  | Date |
|---------------|---|------|
| 1.            | Status of fat-rich dairy products in India and abroad                       |      |
| 2.            | Cream: a) Definition & Legal standards                                      |      |
| 3.            | Efficiency of cream separation and factors affecting it; control of fat     |      |
|               | concentration in cream  |      |
| 4.            | Control of fat concentration in cream                                       |      |
| 5.            | Planning and operating a cream production unit) neutralization,             |      |
|               | standardization, pasteurization and cooling of cream.                       |      |
| 6.            | Planning and operating a cream production unit) neutralization,             |      |
|               | standardization, pasteurization and cooling of cream                        |      |
| 7.            | Preparation properties of different types of cream; table cream, sterilized |      |
|               | cream, whipped cream, plastic cream, frozen cream and chip-dips             |      |
|               | (cultured cream)  |      |
| 8.            | Properties of different types of cream: table cream, sterilized cream,      |      |
|               | whipped cream, plastic cream, frozen cream and chip-dips (cultured          |      |
|               | cream)  |      |
| 9.            | UHT processing of cream   |      |
| 10.           | Factors affecting quality of cream  |      |
| 11.           | Ripening of cream   |      |
| 12.           | Packaging, storage and distribution, defects (non-microbial) in cream       |      |
|               | and their prevention  |      |
| 13.           | Packaging, storage and distribution, defects (non-microbial) in cream       |      |
|               | and their prevention  |      |
| 14.           | Butter: a) Introduction to the butter making process                        |      |
| 15.           | Composition, Classification and Legal standards                             |      |
| 16.           | Theory of churning  |      |
| 17.           | Technology of Butter manufacture, Batch and continuous methods              | 15   |
| 18.           | Over-run in butter; control of fat loses in butter-milk                     |      |
| 19.           | Packaging, storage and transportation                                       |      |
| 20.           | Defects in butter   |      |
| 21.           | Uses and Rheology of butter   |      |
| 22.           | Butter making equipment: Construction, operation, care and                  | -    |
|               | maintenance of cream separators, coolers and vacreator                      |      |
| 23.           | Factory butter churn and continuous butter making machine                   |      |
| 24.           | Special butters and related products:                                       |      |
| 25.           | Manufacture, packaging, storage and properties of whey butter,              |      |
|               | flavoured butter, whipped butter  |      |
| 26.           | Renovated butter/fractionated and polyunsaturated milk fat products         |      |
| 27.           | Vegetable oil-blended products and low-fat spreads.                         |      |
| 28.           | Manufacture, packaging, storage and characteristics of margarine of         |      |
| 20.           | different types   |      |
| 29.           | Manufacture, packaging, storage and characteristics of margarine of         |      |
|               | different types.  |      |
| 30.           | Ghee and butter oil: Methods of ghee making-batch and industrial            |      |
|               | processes, innovations in ghee production, procedure, packaging and         |      |
|               | preservation of ghee; utilization of substandard milk.                      |      |
| 31.           | Ghee: Composition and changes during manufacture fat constants              |      |
| 32.           | Butteroil: Manufacture of butteroil, nackaging and storage.                 |      |

| Lecture No. | Topics   | Date  |
|-------------|--|-------|
| 1.          | History, status and scope in India and abroad                                      |       |
| 2.          | Definition and legal standards for evaporated and condensed milks                  |       |
| 3.          | Grading and quality of raw milk for condensed milks and evaporated milk            |       |
| 4.          | Pretreatments for Concentrated Milks   |       |
| 5.          | Manufacturing techniques: Basics of evaporators                                    |       |
| 6.          | Condensed milk   |       |
| 7.          | Manufacture of sweetened condensed milk  |       |
| 8.          | Manufacture of sweetened condensed milk- operations                                |       |
| 9.          | Manufacture of evaporated milk   |       |
| 10.         | Pilot sterilization and heat stabilization for evaporated milk                     | 10000 |
| 11.         | Recombined concentrated milks-raw materials  |       |
| 12.         | Recombined concentrated milks-processing   |       |
| 13.         | Physico-chemical changes during manufacture of condensed milk:Changes              |       |
|             | Caused by Concentration, Effect of sterilization on viscosity of product, Increase |       |
|             | in viscosity by progressive coagulation of milk proteins, Effect of storage on     |       |
|             | viscosity  |       |
| 14.         | Sweetened Condensed Milk : Age thickening, Maillard browning, Oxidative            |       |
|             | changes, Lactose crystallization   |       |
| 15.         | Heat stability of milk   |       |
| 16.         | Heat stability of condensed milk   |       |
| 17.         | Defects in sweetened condensed milks: Causes                                       |       |
| 18.         | Defects in sweetened condensed milks: Prevention                                   |       |
| 19.         | Defects in evaporated milks  |       |
| 20.         | Freeze concentration   |       |
| 21.         | Membrane concentration   |       |
| 22.         | Dried Milks: history and status in India and abroad                                |       |
|             | Grading and quality of raw milk for dried milks                                    |       |
| 23.         | Technology of dried milks: Drum or roller drying                                   |       |
|             | Classification of Drum Dryers  |       |
|             | Flow of Product, Drums, Moisture Removal   |       |
| 24.         | Factors Affecting Production from a Drum Drier                                     |       |
|             | Operation and Maintenance  |       |
| 25.         | Freeze, vacuum and foam drying:  |       |
|             | Introduction, Advantages, Disadvantages, Vacuum Drying                             |       |
|             | Foam Drying, Advantages and Limitations  |       |
| 26.         | Spray drying: Introduction   |       |
|             | Heating of the air, Atomizing the concentrate in the air                           |       |
| 27.         | Mixing hot air and atomized liquid   |       |
|             | Separating powder and consumed drying air  |       |
| 28.         | Aggregation of powder particles: Second-stage drying Drying Functions              |       |
| 29.         | Classification of spray dryers, Characteristics of spray driers                    |       |
| 30.         | Air heating: Air Filter, Air Heater ,The direct and semi direct heating systems ,  |       |
|             | Counter Current versus Parallel Current Flow                                       |       |
| 31.         | Atomization: Introduction, Advantages of Atomization                               |       |
|             | Types of Atomizers, Change of State of the Drying Air                              |       |

| Lecture | Topics   | Dete |
|---------|--|------|
| No.     |  | Date |
| 1.      | Status and availability in India and Abroad  |      |
| 2.      | Utilization of dairy by-products   |      |
| 3.      | Associated economic and pollution problems   |      |
| 4.      | Physico-chemical characteristics of whey, buttermilk and ghee residue  |      |
| 5.      | By-products from skim milk: Casein: types of commercial casein and their specifications  |      |
| 6.      | Manufacturing processes of casein with basic principles involved   |      |
| 7.      | Industrial and food uses of caseins  |      |
| 8.      | Manufacture of sodium and calcium caseinate  |      |
| 9.      | Physico-chemical properties of sodium and calcium caseinate  |      |
| 10.     | Functional properties of sodium caseinate and calcium caseinate  |      |
| 11.     | Food applications of sodium caseinate and calcium casienate  |      |
| 12.     | Manufacture of casein hydrolysates and its industrial application  |      |
| 13.     | Co-precipitates: types, their specifications, manufacturing processes with basic principles involved, functional properties and food applications.                                       |      |
| 14.     | Whey processing:a) Fermented products from whey  |      |
| 15.     | Whey processing:a) Fermented products from whey  |      |
| 16.     | Whey processing:a) Fermented products from whey  |      |
| 17.     | b)Beverages from whey  |      |
| 18.     | b) Beverages from whey   |      |
| 19.     | c) Deproteinized and demineralized whey  |      |
| 20.     | d) Condensed whey  |      |
| 21.     | d) Condensed whey  |      |
| 22.     | e) Dried whey, types and their specification, manufacturing techniques   |      |
| 23.     | F) Utilization of whey products. Application of membrane processing for whey   |      |
|         | processing.  |      |
| 24.     | Whey protein concentrates: a) Methods of isolation with basic principles involved, physico-chemical properties of whey proteins concentrates   |      |
| 25.     | b) Functional properties and food applications of WPC. <i>Lactose:</i> methods for the industrial production of lactose, refining of lactose, uses of lactose and hydrolysis of lactose. |      |
| 26.     | b) Functional properties and food applications of WPC. Lactose: methods for the industrial production of lactose, refining of lactose, uses of lactose and hydrolysis of lactose.        |      |
| 27.     | Butter milk processing: a) Condensed butter milk b) Dried butter milk c) Utilization of butter milk products.  |      |
| 28.     | Butter milk processing: a) Condensed butter milk b) Dried butter milk c) Utilization of butter milk products.  |      |
| 29.     | Ghee residue: Composition, processing and utilization.   |      |
| 30.     | Ghee residue: Composition, processing and utilization.   |      |
| 31.     | Nutritional characteristics of by products   |      |
| 32.     | Nutritional characteristics of by products   |      |

|                | Department            | of Daily reclimotos |                    |

| Lecture<br>No. | Topics  | Date |          |
|----------------|---|------|----------|
| 1.             | Manufacture of edible casein from cow and buffalo milk                  |      |          |
| 2.             | Manufacture of rennet casein  |      |          |
| 3.             | Manufacture of sodium caseinate   |      |          |
| 4.             | Manufacture of calcium caseinate  |      |          |
| 5.             | Manufacture of co-precipitate   |      |          |
| 6.             | Isolation of whey proteins by cold precipitation technique              |      |          |
| 7.             | Manufacture of whey proteins, concentration by ultra filtration process |      |          |
| 8.             | Manufacture of whey drinks  |      |          |
| 9.             | Manufacture of dried whey   |      |          |
| 10.            | Manufacture of lactose  |      |          |
| 11.            | Chemical analysis of whey protein concentrates                          |      |          |
| 12.            | Chemical analysis of lactose  |      |          |
| 13.            | Microbiological analysis of casein and dried whey                       |      |          |
| 14.            | Incorporation of whey proteinconcentrates in processed cheese foods     |      | 1,115,20 |
| 15.            | Manufacture of coffee whitener  |      |          |
| 16.            | Manufacture of edible casein from cow and buffalo milk                  |      |          |

| Lecture<br>No. | Topics   | Date |
|----------------|--|------|
| 1              | Introduction, definition, importance and application of sensory evaluation in                                      | Date |
| 1              | relation to consumer acceptability and economic aspects.   |      |
| 2              | Terminology related to sensory evaluation.   |      |
| 3              | Design and requirements of sensory evaluation.   |      |
| 4              | Basic Principles: senses and sensory perception.   |      |
| 5, 7           | Physiology of sensory organ-tongue, ear and nose.  |      |
| 8              | Classification of tastes and odour, threshold value  |      |
| 0              | Factor affecting senses, visual, auditory tactile & other responses  |      |
| 9              | Measurement of sensation intensity.  |      |
| 10             |  |      |
|                | Fundamental rules for scoring & grading of milk & milk products  |      |
| 11             | Procedure & type of texture  | -    |
| 12             | Difference tests (paired comparison, due – trio, triangle), ranking, scoring, hedonic scale and descriptive tests. |      |
| 13             | Panel selection, screening and training of judges; Requirement of sensory  |      |
|                | evaluation, sampling procedure, Factor influencing sensory measurements  |      |
| 14             | Judging and grading of milk  |      |
| 15             | Desirable and undesirable characteristics of fermented milks, sensory  |      |
|                | evaluation of dahi, yoghurt, chakka, shrikhand, lassi and other fermented  |      |
|                | drinks.  |      |
| 16             | Desirable and undesirable characteristics of fermented milks, sensory  |      |
| -5             | evaluation of dahi, yoghurt, chakka, shrikhand, lassi and other fermented  | ľ    |
| 1              | drinks.  |      |
| 17 - 18        | Sensory attributes of fresh and ripened cheese.  |      |
| 19             | Sensory evaluation of cream  |      |
| 20             | Butter: specific requirements of high grade butter, undesirable attributes of                                      |      |
|                | butter, butter score card, sensory evaluation of butter.   |      |
| 21             | Ghee: grade of ghee special requirements of quality ghee, defects in ghee, ghee                                    |      |
|                | score card, sensory evaluation of ghee.  |      |
| 22             | Frozen ice cream: Desirable and undesirable characteristics of ice-cream,  |      |
|                | sensory evaluation of Ice cream.   |      |
| 23             | Desirable and undesirable characteristics of kulfi and milk sherbets. Sensory                                      |      |
|                | evaluation of <i>kulfi</i> and milk sherbets.  |      |
| 24             | Concentrated Milks: Desirable attributes and defects, judging and grading of                                       |      |
|                | evaporated and condensed milks.  |      |
| 25             | Dried Dairy Products: Desirable and undesirable characteristics of dried dairy                                     |      |
| 25             | products. Judging and grading of dried dairy products.   |      |
| 26             | Heat desiccated Indian dairy products & Khoa based sweets: Desirable and   |      |
| 20             | undesirable characteristics of different types of khoa based, i.e. Peda,   | 1    |
|                | gulabjamun_etc.  |      |
| 27             |  |      |
| 27             | Sensory evaluation of khoa based sweetes.  |      |

| 28     | Acid coagulated Indian milk products: desirable characteristics of panner and defects, judging and grading of panner.  |  |
|--------|--|--|
| 29     | Chhana and chhana based Sweets: Desirable and undesirable characteristics of Chhana and Chhana based sweets Sensory evaluation of chhana and chhanabased sweets. |  |
| 30     | Objectives, methods, types of questionnaires, development of questionnaires  |  |
| 31, 32 | Interrelationship between sensory properties of dairy products with instrumental and physic chemical tests.  |  |

| Lecture<br>No. | Topics   | Date  |
|----------------|--|-------|
| 1.             | Status of food processing industries in India and abroad   |       |
| 2.             | Magnitude and inter- dependence of dairy and food industry, prospects for future growth in India   |       |
| 3.             | Harvesting of fruits and vegetables  |       |
| 4.             | Transportation and storage of fruits and vegetables  |       |
| 5.             | Post harvest processing of fruits and vegetables   |       |
| 6.             | Peeling, blanching and sizing of fruits and vegetables   |       |
| 7.             | Canning, Drying and Freezing of fruits and vegetables  |       |
| 8.             | Juice processing- General steps in juice processing  |       |
| 9.             | Role of enzymes in fruit   |       |
| 10.            | Juice extraction, equipments and methods of fruit juice extraction   |       |
| 11.            | Preservation of fruit juices and fruit juice clarification,  |       |
| 12.            | Concentration of fruit juices and fruit juice powders  |       |
| 13.            | Fruit juice processing; Orange and tangerine, Lemon and lime juice, Apple juice and Grape juice  |       |
| 14.            | Fruit juice processing; Nectars, pulpy juices and tropical blends, Vegetable juices  |       |
| 15.            | Jam, Jelly and Marmalade   |       |
| 16.            | Role played by pectin, sugar & acid in jellied fruit products  |       |
| 17.            | Fruits and vegetable preserves and Glazed and Crystallized fruits  |       |
| 18.            | Tomato base products: Juice, puree and paste   |       |
| 19.            | Tomato base products: Sauce and Ketchup  |       |
| 20.            | Pickles: Definition, Principle and Technology of pickles   |       |
| 21.            | Beverages - Classification, scope, carbonated non-alcoholic beverages  |       |
| 22.            | Manufacture of carbonated non-alcoholic beverages  |       |
| 23.            | Fruit beverages and drinks, additives for fruit based beverages  |       |
| 24.            | Coffee: Production practices and structure of coffee/cherry. Coffee processing including roasting, grinding, brewing extraction, dehydration and aromatization |       |
| 25.            | Instant coffee   |       |
| 26.            | Tea-Introduction and Types: green, red and yellow. Tea leaf processing   | 3     |
| 27.            | Technology of confectionery foods- a) Candies, b) Chewing gums and bubble gums   |       |
| 28.            | c) Toffees, Caramels and Standards of confectionery products   |       |
| 29.            | Chocolate products: Cocoa bean processing  |       |
| 30.            | Chocolate liquor and Standards of confectionery products   |       |
| 31.            | Functional foods: Introduction-Phytochemicals  |       |
| 32.            | Milk ingredients as nutraceuticals. Fiber-rich food products   | 9 1 = |

| 6.  | Milling technology of wheat,   |      |
| 7.  | Criteria of wheat flour quality, improvers for wheat flour, Types of wheat flour,                        |      |
| 8.  | Criteria of wheat flour quality, improvers for wheat flour, Types of wheat flour,\                       |      |
| 9.  | Milling technology of maize, wet milling of corn,  |      |
| 10. | Milling technology of barley, malting of barley  |      |
| 11. | and its utilization in manufacture of value added food products including malted milk foods,             |      |
| 12. | Dehulling and processing technology of important pulses,   |      |
| 13. | Dehulling and extraction of oil in major oilseed crops like soy bean, mustard, sunflower, ground nut,    |      |
| 14. | Dehulling and extraction of oil in major oilseed crops like soy bean, mustard, sunflower, ground nut,    |      |
| 15. | Vegetable protein concentrates/isolates,   |      |
| 16. | Utilization of oil cake in food formulation.   | 2.0  |
| 17. | Bakery and Snack technology: Technology of bread, biscuits, crackers and cakes,                          |      |
| 18. | Technology of manufacturing process of Pasta foods- Macaroni, Noodles and Spaghetti,                     |      |
| 19. | Technology of manufacturing process of Pasta foods- Macaroni, Noodles and Spaghetti,                     |      |
| 20. | Technology of breakfast cereals: corn flakes, puffed, extruded snacks, Potato chips.                     |      |
| 21. | Meat, fish and egg technology: Development of meat, poultry, egg and fish industry in India              |      |
| 22. | Meat, fish and egg technology: Development of meat, poultry, egg and fish industry in India              |      |
| 23. | Pre-slaughter care, handling and ante-mortem inspection of animal, Stunning and slaughtering techniques, |      |
| 24. |  |      |
| 25. | Postmortem inspection, rigor mortis and conversion of muscle to meat Slaughter house sanitation,         |      |
| 26. | Postmortem inspection, rigor mortis and conversion of muscle to meat Slaughter house sanitation          |      |
| 27. | meat hygiene and zoonotic diseases, Processing of poultry meat,  |      |
|     | Egg and egg products - quality assessment of egg, Cleaning and sanitation,                               |      |

| 30. | Types, handling, transportation and marketing of fish, Preservation of fish., |  |
|-----|---|--|
| 31. | Cleaning and sanitation, Waste management of food processing plants.          |  |
| 32. | Cleaning and sanitation, Waste management of food processing plants           |  |

| Course 1111      | Course Title: Food Technology II  |                                | Course No | DT-813 (Prac | tical) |

## ANNEXURE No. II

List of Teaching / Lecture Schedule Practical Schedule

Department of Dairy Engineering

|                |                   | J B B B                        |                 |
|----------------|-------------------|--------------------------------|-----------------|
|                | TEACHING SO       | CHEDULE (V <sup>th</sup> Dean) |                 |
| Course Title:  | Workshop Practice | Course No.                     | DE-101 (Theory) |
| Course Credit: | 1+1 = 2           | Semester                       | I (V Dean)      |

| Lecture No. | Topics   | Date      |  |
|-------------|--|-----------|--|
| 1.          | Introduction to workshop practice, Safety, care and precautions in workshop            |           |  |
| 2.          | Introduction to Wood working tools and their use, Carpentry.                           |           |  |
| 3.          | Pattern making, Mould material and their applications                                  |           |  |
| 4.          | Heat treatment processes: importance and types, hardening, tempering                   | (Notice - |  |
| 5.          | Heat treatment processes : Annealing, normalizing                                      |           |  |
| 6.          | Metal cutting, Welding: Principle and types, gas welding                               |           |  |
| 7.          | Important terms related to welding, Techniques of welding                              |           |  |
| 8.          | Arc welding, Importance of Welding rod and its types                                   |           |  |
| 9.          | Smithy and forging operations: Smithy and forging tools and equipment                  |           |  |
| 10.         | The bench: Flat surface filing, Chipping, Scraping Marking out, Drilling and Screwing. |           |  |
| 11.         | Use of jigs and fixtures in production   |           |  |
| 12.         | Introduction to Lathe machine, Operation on lather machine, Types of lathe machine     |           |  |
| 13.         | Milling machine: types and operation   |           |  |
| 14.         | Introduction to Shaper and planer  |           |  |
| 15.         | Introduction to Drilling and boring machines   |           |  |
| 16.         | Introduction to Grinder, CNC machines  | -         |  |

Department of Dairy Engineering

|                |                   | Daily Digiticering |                    |
|----------------|-------------------|--------------------|--------------------|
|                | TEACHING SO       | CHEDULE (Vth Dean) |                    |
| Course Title:  | Workshop Practice | Course No.         | DE-101 (Practical) |
| Course Credit: | 1+1 = 2           | Semester           | I (V Dean)         |

| Practical No. | Topics   | Date |
|---------------|--|------|
| 1.            | Safety and precautions in workshop, Study of commonly used tools in workshop   |      |
| 2.            | Study of Lathe machine.  |      |
| 3.            | Study of radial drilling machine.  |      |
| 4.            | Study of milling machine.  |      |
| 5.            | Study of different operations on lathe machine (Turning, Tapering, Finishing). |      |
| 6.            | Study of different operations on lathe machine (Facing, Threading, Reducing).  |      |
| 7.            | Study of chisels.  |      |
| 8.            | Study of Bench grinder.  |      |
| 9.            | Study of arc welding.  |      |
| 10.           | Study of inert gas welding.  |      |
| 11.           | Simple exercises in Soldering and brazing,                                     |      |
| 12.           | Study of carpentry tools.  |      |
| 13.           | Study of Basic joints in carpentry.  |      |
| 14.           | Study of saws and its operations.  |      |
| 15.           | Simple exercises in Filing.  |      |
| 16.           | Study of different operations on wood lathe                                    |      |

**Department of Dairy Engineering** 

|                | TEACHING S      | CHEDULE (Vth Dean) |                 |
|----------------|-----------------|--------------------|-----------------|
| Course Title:  | Fluid Mechanics | Course No.         | DE-102 (Theory) |
| Course Credit: | 2+1 = 3         | Semester           | I (V Dean)      |

| Lecture No. | Topics   | Date                   |
|-------------|--|------------------------|
| 1.          | Introduction to fluid mechanics, Units and dimensions, Properties of fluids                                |                        |
| 2.          | Static pressure of liquids   |                        |
| 3.          | Hydraulic pressure, absolute and gauge pressure, pressure head of a liquid                                 |                        |
| 4.          | Pressure on vertical rectangular surfaces  |                        |
| 5.          | Compressible and non compressible fluids   |                        |
| 6.          | Surface tension, capillarity   |                        |
| 7.          | Pressure measuring devices, simple, differential, micro manometer  |                        |
| 8.          | Inclined manometer, mechanical gauges, Piezometer  |                        |
| 9.          | Numerical on determination of pressure exerted by liquid column  | Parking St. Calabratic |
| 10.         | Fluid flow: Classification, steady uniform and non uniform flow, Laminar and turbulent                     |                        |
| 11.         | Numerical on Laminar and turbulent flow  |                        |
| 12.         | Continuity equation, Bernoulli's theorem and its applications.   |                        |
| 13.         | Numerical on Bernoulli's theorem   |                        |
| 14.         | Flow through pipes: Loss of head, determination of pipe diameter.  |                        |
| 15.         | Numerical on Loss of head, determination of pipe diameter.   |                        |
| 16.         | Determination of discharge, friction factor, critical velocity   |                        |
| 17.         | Flow through orifices, mouthpieces, notches and weirs  |                        |
| 18.         | Vena contracta, hydraulic coefficients, discharge losses, Time for emptying a tank.                        |                        |
| 19.         | Numericals on hydraulic coefficients, discharge losses, Time for emptying a tank.                          |                        |
| 20.         | Loss of head due to contraction, enlargement at entrance and exit of pipe.                                 |                        |
| 21.         | Numericals on Loss of head due to contraction, enlargement at entrance and exit of pipe                    |                        |
| 22.         | External and internal mouthpieces, types of notches, rectangular and triangular notches, rectangular weirs | NO-764 2               |
| 23.         | Venturimeters, pitot tube  |                        |
| 24.         | Rota meter: working, constructional features, advantages and disadvantages                                 |                        |
| 25.         | Water level point gauge, hook gauge.   | (i) Skerk              |
| 26.         | Dimensional analysis: Buckingham's theorem application to fluid flow phenomena                             |                        |
| 27.         | Dimensionless number: Reynolds number, Froude number, Weber Number   |                        |
| 28.         | Pumps: Classification, reciprocating, centrifugal pump and their introduction                              |                        |
| 29.         | Centrifugal pump: Working, Classification and design   |                        |
| 30.         | Reciprocating Pump: Working, Classification and design   |                        |
| 31.         | PUMP: Pressure variation, work efficiency. Types of chambers, selection and sizing.                        |                        |
| 32.         | Calculation of NPSH  |                        |

|   | Dopar entrain of Dates / |          |            |  |  |

|   | e course material   |

|   | TEACHING SCI | HEDULE (V <sup>th</sup> Dean) |            |  |  |
|---|--------------|-------------------------------|------------|--|--|
| Course Title: Engineering Drawing Course No. DE-103 (Practical) |              |                               |            |  |  |
| Course Credit:  | 0+1 = 1      | Semester                      | I (V Dean) |  |  |

| Practical No. | Topics   | Date |  |
|---------------|--|------|--|
| 1.            | 1. Introduction to engineering drawing and Tools used for engineering drawing, Drawing of lines and its types, |      |  |
| 2.            | Drawing of lettering and dimensioning, types of lettering, types of dimensioning.                              |      |  |
| 3.            | Drawing of scales: Plain scale, diagonal scale,  |      |  |
| 4.            | Drawing of scales: Comparative scale   |      |  |
| 5.            | Drawing of scales: Vernier scale   |      |  |
| 6.            | Projection, Types of Projection  |      |  |
| 7.            | Orthographic Projection (First quadrant drawing),  |      |  |
| 8.            | Orthographic Projection (Third quadrant drawing)   |      |  |
| 9.            | Perspective Projection   |      |  |
| 10.           | Drawing of screw threads; Types of threads and terminologies used in lit                                       |      |  |
| 11.           | Screw fastening: Types of nuts, types of bolts, stud,  |      |  |
| 12.           |  |      |  |
| 13.           | Drawing of keys, types of keys,  |      |  |
| 14.           | Drawing of cotter joint, pin joints, types of cotter joints, pin joints  |      |  |
| 15.           |  |      |  |
| 16.           | Journal bearings, pivot bearings, collar bearings  |      |  |

| Suggested Readings                 |  |

| Course Title: Thermodynamics Course No. DE-204 (Theory) |            |                                |             |  |  |
| Course Credit:  | 1+1 = 2    | Semester                       | II (V Dean) |  |  |

| Lecture No.                        | Topics  | Date |  |
|------------------------------------|---|------|--|
| 1.                                 | Importance and applications of thermodynamics in Dairy/Food processing.             |      |  |
| 2.                                 | Basic concepts: Thermodynamic systems, properties.                                  |      |  |
| 3.                                 | State, processes, cycles, energy.   |      |  |
| 4.                                 | The Zeroth Law of Thermodynamics.   |      |  |
| 5.                                 | Ideal gases: Equation of state, Compression and expansion of gases                  |      |  |
| 6.                                 | The first Law of Thermodynamics: Internal energy, enthalpy.                         |      |  |
| 7.                                 | Analysis of non-flow processes  |      |  |
| 8.                                 | Analysis flow processes.  |      |  |
| 9.                                 | The second Law of Thermodynamics: Thermodynamic.                                    |      |  |
| 10.                                | Temperature scale, Carnot cycle, heat engine, entropy, reversibility, availability. |      |  |
| 11.                                | Air Cycles: Otto, Diesel, dual cycles and their efficiencies.                       |      |  |
| 12.                                | Plotting the air cycles on p-V, T-S, p-h diagram etc.                               |      |  |
| 13.                                |   |      |  |
| 14.                                | Working of two stroke and four stroke cycle.  | 8    |  |
| 15. S.I. engines and C.I. engines. |   |      |  |
| 16.                                | Parts of I.C. engine, Performance of IC engines.                                    |      |  |

| Practical No. | Topics  | Date |
|---------------|---|------|
| 1.            | A visit to dairy/ food processing plant showing the thermodynamics applications/ devices. |      |
| 2.            | Study of 2-stroke engines   |      |
| 3.            | Study of 4-strokes IC engines working   |      |
| 4.            | Study of S.I. engines working   |      |
| 5.            | Study of C.I. engines working   |      |
| 6.            | Study of multi-cylinder IC engine   |      |
| 7.            | Study of modern fuel injection systems of I.C. engines.                                   |      |
| 8.            | Study of diesel fuel supply system (pump and fuel injector) of I.C. engine.               |      |
| 9.            | Study of fuel supply system of a petrol engine  |      |
| 10.           | Study of cooling system of an I.C. engine (air cooling).                                  |      |
| 11.           | Study of cooling system of an I.C. engine (water cooling).                                |      |
| 12.           | Study of lubrication system of I.C. engine.   |      |
| 13.           | Study of Solar water heater and appliances,   |      |
| 14.           | Study of solar lighting system  |      |
| 15.           | Study of biogas plants and appliances   |      |
| 16.           | Study of air compressor   |      |

| Course Credit: | 2+1 = 3              | Semester                      | II (V Dean)     |

| Lecture No. | Topics   | Date |
|-------------|--|------|
| 1.          | Basic heat transfer process: thermal conductivity, convective film coefficient           |      |
| 2.          | Stefan Boltzman's constant and equivalent radiation co-efficient                         |      |
| 3.          | Overall heat transfer co-efficient, physical properties related to heat transfer.        |      |
| 4.          | Working principles and application of various instruments for measuring temperature.     |      |
| 5.          | One-dimensional steady state conduction  |      |
| 6.          | Theory of heat conduction  |      |
| 7.          | Fourier's law, Derivation of Fourier's equation in Cartesian coordinates                 |      |
| 8.          | Study of Linear heat flow through slab and cylinder.                                     |      |
| 9.          | Study of Linear heat flow through sphere.  |      |
| 10.         | Cylinder and sphere with non-uniform thermal conductivity.                               |      |
| 11.         | Concept of electrical analogy and its application for thermal circuits                   |      |
| 12.         | Heat transfer through composite walls and insulated pipelines.                           |      |
| 13.         | Heat transfer through insulated pipelines.   |      |
| 14.         | Steady-state heat conduction with heat dissipation to environment                        |      |
| 15.         | Introduction to extended surfaces (FINS) of uniform area of cross-section.               |      |
| 16.         | Equation of temperature distribution with different boundary conditions                  |      |
| 17.         | Effectiveness and efficiency of the FINS.  |      |
| 18.         | Introduction to unsteady state heat conduction.  |      |
| 19.         | Convection: Forced and free convection   |      |
| 20.         | Use of dimensional analysis for correlating variables affecting convection heat transfer |      |
| 21.         | Concept of Nusselt number Prandtl number   |      |
| 22.         | Reynolds number, Grashoff number.  |      |
| 23.         | Some important empirical relations used for determination of heat transfer coefficient.  |      |
| 24.         | Heat Exchangers: General discussion, fouling factors,                                    |      |
| 25.         | Jacketed kettles, LMTD,  |      |
| 26.         | Parallel and counter flow heat exchangers,   |      |
| 27.         | Shell and tube and plate heat exchangers,  |      |
| 28.         | Heat exchanger design.   |      |
| 29.         | Application of different types of heat exchangers in dairy and food industry             |      |
| 30.         | Mass transfer: Fick's Law of diffusion   |      |
| 31.         | Steady state diffusion of gases and liquids through solids                               |      |
| 32.         | Equimolal diffusion Mass transfer co-efficient and problems on mass transfer.            |      |

| Course Title: Basic Electrical Engineering Course No. DE-207 (Theory) |              |                              |             |  |
| Course Credit:  | 2+1 = 3      | Semester                     | II (V Dean) |  |

| ecture No.   | Topics   | Date  |  |
|--|--|-------|--|
| 1.   | Alternating current fundamentals.  |       |  |
| 2.   | Generation of alternating current or voltage magnitude of induced E.M.F.   |       |  |
| 3. Alternating current, R.M.S value and average value of an alternating current. |  |       |  |
| 4. Phase relation and vector representation.                                     |  |       |  |
| 5.   | Cycle, Time period, Frequency, Amplitude, Phase and Phase Difference.  | 1,153 |  |
| 6.   | Root - Mean Square Value, Average value, Form Factor, Crest or Amplitude Factor.   |       |  |
| 7.   | Poly-phase Circuit: - Generation of Poly-phase Voltage, Phase Sequence.  |       |  |
| 8.   | Interconnection of Three Phases such as Star Connection and Delta Connection and their respective value of current and voltages.                           |       |  |
| 9.   | Energy Measurement by using Single and Two Watt-meters.  |       |  |
| 10.  | Transformers: - Working Principle of Transformer.  | 1000  |  |
| 11.  | Construction features of Core and Shell type transformer, Elementary theory of an Ideal Transformer.   |       |  |
| 12.  | E.M.F. Equation of a Transformer, Vector diagram of transformer with and without load.   |       |  |
| 13.  | Transformer losses, voltage regulation and efficiency of transformer.  |       |  |
| 14.  | Construction and working on a Single Auto-transformer, Different parts of a 11/0.4 KV, Distribution Transformer.   |       |  |
| 15.  | Three Phase Induction Motor: - Fundamental working principles, Production of rotating magnetic fields, construction.                                       |       |  |
| 16.  | Different types of Rotor such as Squirrel Cage and Phase wound rotors, Starting of induction motors using Direct on Line (DOL) and Star-Delta Starter.     |       |  |
| 17.  | Soft starter and variable frequency drives.  |       |  |
| 18.  | Single Phase Induction Motors: - Introduction, Different types of single phase induction motors such as Split Phase.                                       |       |  |
| 19.  | Capacitor type, Shaded Pole type, Universal or AC series motors, Repulsion start induction run motor, Repulsion – induction motor.                         |       |  |
| 20.  | DC Machine:- Construction and operation of DC generator, types of generators and their various characteristics.  |       |  |
| 21.  | DC motors: Torque speed characteristics of DC motors, Starting and speed control of DC motors by using 3-point DC Starter.                                 |       |  |
| 22.  | Alternators: - Elementary working principles, Different parts of an Alternators.   |       |  |
| 23.  | Relation between Speed and Frequency, E.M.F. equation in Alternators.  |       |  |
| 24.  | Different types of Circuit Breaker and its use. Introduction to DG set system.   |       |  |
| 25.  | Electric Power Economics: - Economics of Generation of electrical energy and related important terms such as, load curve, connected load, Maximum Demand.  |       |  |
| 26.  | Demand Factor, Average load or demand, Load Factor, Diversity factor and its significance, Capacity Factor or Plant factor.                                |       |  |
| 27.  | Utilization Factor, Plant Operating Factor and Selection of Units and related numerical, Various types of Tariff used for calculation of electricity bill. |       |  |
| 28.  | Lighting system: Introduction to industrial lighting system.   | 200   |  |
| 29.  | Energy Management and Power Factor Corrections: - Types of energy.   |       |  |
| 30.  | Energy Management, Concept of Energy Audit.  |       |  |
| 31.  | Concept of Power Factor, Disadvantages of low power factor, Causes of low power factor.  |       |  |
| 32.  | Various methods of improving low power factor, Location of power factor correction equipment, Advantages of power factor improvement.                      |       |  |

| TEACHING SCHEDULE (Vth Dean)   |         |          |             |  |  |
|--|---------|----------|-------------|--|--|
| Course Title: Basic Electrical Engineering   Course No.   DE-207 (Practical) |         |          |             |  |  |
| Course Credit:   | 2+1 = 3 | Semester | II (V Dean) |  |  |

| Practical No. | Topics   | Date |
|---------------|--|------|
| 1.            | Introduction to various basic circuits of parallel wiring, stair case wiring, fluorescent light fitting.             |      |
| 2.            | Study of voltmeter and ammeter.  |      |
| 3.            | Study of energy meter.   |      |
| 4.            | Study of voltage and current relationship in case of Star connected load.  |      |
| 5.            | Study of voltage and current relationship in case of Delta connected load.   |      |
| 6.            | Measurement of power in 3-phase circuit; for a balanced load, using watt meters.                                     |      |
| 7.            | Measurement of power in 3-phase circuit; for a unbalanced load, using watt meters.                                   |      |
| 8.            | Measurement of iron losses of Single Phase transformer by conducting open circuit test.                              |      |
| 9.            | Measurement of Copper losses of Single Phase transformer by conducting short circuit test.                           |      |
| 10.           | Starting and reversing the speed of a single phase induction motor.  |      |
| 11.           | Starting and reversing the speed of a three phase induction motor using Direct on Line (DOL) Starter.                |      |
| 12.           | Starting and reversing the speed of a three phase induction motor using manual Star Delta Starter.                   |      |
| 13.           | Starting and reversing the speed of a DC shunt motor using 3-point DC Starter.                                       |      |
| 14.           | Starting of slip-ring induction motor by manual and automatic Slip-ring Induction Motor Starter.                     |      |
| 15.           | To determine the relation between induced armature voltage and speed of separately /self excited DC Shunt Generator. |      |
| 16.           | Study of generator: construction and operation.  |      |

| Suggested Readings  |

| A Text Book of Electrical Technology Vol I and Vol II by Theraja B.L. |
| A Textbook of Electrical Engineering by Sanjiv Kumar                  |
| e course material   |

| DULE (V <sup>th</sup> Dean) |                 |
|-----------------------------|-----------------|
|                             |                 |
| Course No.                  | DE-308 (Theory) |
| Semester                    | III (V Dean)    |
| Н                           |                 |

| Lecture No.   | Topics   | Date |  |  |
|---|--|------|--|--|
| 1.  | Basic refrigeration cycles and concepts: Standard rating refrigerating machines                                |      |  |  |
| 2.  | Elementary vapour compression refrigeration cycle with reciprocating, rotary and centrifugal compressors       |      |  |  |
| 3.  | cycle, representation on T- and p-h diagrams   |      |  |  |
| 4.  | 4. Comparison of working of refrigerator, heat pump and heat engine  |      |  |  |
| 5.  | Numerical on COP of refrigerator, heat engine and heat pump  |      |  |  |
| 6.  | Mathematical analysis of vapour compression refrigeration system   |      |  |  |
| 7.  | Refrigerants: Primary and secondary refrigerants, common refrigerants (Ammonia, Freon, HFC, HCFC etc), Brine,  |      |  |  |
| 8.  | Properties of refrigerants and comparison  |      |  |  |
| 9.  | Multi-pressure refrigeration system: applications  |      |  |  |
| 10.   | Multiple vapour compression refrigeration system: for different conditions                                     |      |  |  |
| 11.   | Multiple vapour compression refrigeration system: for different conditions                                     |      |  |  |
| 12.   | Multiple vapour compression refrigeration system: for different conditions                                     |      |  |  |
| 13.   | Numerical on multiple vapour compression refrigeration system  |      |  |  |
| 14.   | Multi evaporators with single stage and multi stage compression and expansion system: concept and applications |      |  |  |
| 15.   | Multi evaporator vapour compression refrigeration system : its types   |      |  |  |
| 16.   | Multi evaporator vapour compression refrigeration system : its types   | 100  |  |  |
| 17.   | Numerical on multiple evaporator vapour compression refrigeration system                                       |      |  |  |
| 18.   | Working, control and mathematical analysis of above systems  |      |  |  |
| 19.   | Compressor: Working, Construction, types and cycle   |      |  |  |
| 20.   | Condenser: Working, Construction and types   |      |  |  |
| 21.   | Evaporator: Working, Construction and types  |      |  |  |
| 22.   | Expansion Valve: Working, Construction and types   |      |  |  |
| 23.   | Controls and Safety Devices as used in different refrigeration applications. Capacity control methods.         |      |  |  |
| 24.   | Refrigeration Piping: Purpose, Types, Materials, Fittings and Insulation.                                      |      |  |  |
| Design and Balancing of Refrigeration System: Basic elements of design of individual components and a complete refrigeration system. Input and Output design parameters, Balancing of components of refrigeration system for optimum performance. |  |      |  |  |
| Absorption Refrigeration Systems: Simple vapour absorption refrigeration systems, Actual Vapour absorption refrigeration system, Refrigerant absorbent pairs, Absorption cycle analysis.  |  |      |  |  |
| 27.   | Cryogenic Freezing: Cryogenics, cryogens, properties, applications, cryogenic freezers.                        |      |  |  |
| 28. Psychrometry: Definition, properties of moist air, psychrometric charts, psychrometric processes; Cooling/ Heating coils, humidifiers and dehumidifiers, Temperature and humidity measurements and controls.                                  |  |      |  |  |
| 29.   |  |      |  |  |
| 30.   | Analysis of different air-conditioning systems with the help of psychrometric chart.                           | -    |  |  |
| 31.   | Cold Storage: Types of cold storages, Types of cooling loads in cold storages used for food/dairy products;    |      |  |  |
| 32.   | Construction and operation of cold storage. Insulating materials and vapour barriers.                          |      |  |  |

Department of Dairy Engineering

TEACHING SCHEDULE (V<sup>th</sup> Dean)

Course Title: Refrigeration & Air Conditioning Course No. DE-308 (Practical)

Course Credit: 2+1 = 3 Semester III (V Dean)

| Practical No.   | Topics   |  |  |
|---|--|--|--|
| 1.  | Study of different types of Refrigeration tools generally used in installation and maintenance of a refrigeration plant/ equipment including charging and leakage-detection tools. |  |  |
| 2.  | Study of specification, components, operation, control, maintenance and precautions taken during working of a Domestic refrigerator.   |  |  |
| 3.  | Study of specifications, components, operation, control, maintenance and precautions taken during working of a Water cooler.   |  |  |
| 4.  | Study of specifications, components, operation, control, maintenance and precautions taken during working of a Bulk milk cooler.   |  |  |
| 5.  | Study of specifications, components, operation, control, maintenance and precautions taken during working of a Walk-in-cooler.   |  |  |
| 6.  | Study of different parts and learn the operation of a refrigeration plant/ice plant using ammonia refrigerant.   |  |  |
| 7.  | Estimation of installed cooling capacity with the help of observed working pressures.  |  |  |
| 8.  | Study of specifications, components, operation, control and maintenance of Ice Bank Tank (IBT).  |  |  |
| 9.  | Study of specifications, components, operation, control and maintenance of a Cold Storage.   |  |  |
| 10.   | Study of the Evaporative Cooling Devices like Cooling Tower, Spray Pond, Air-Washer or Room air-cooler etc.  |  |  |
| 11.   | Study of the parts and components of different types of refrigerant compressors used in various refrigeration applications.  |  |  |
| 12. Study of different types of capacity control devices used with coin a refrigeration plant.  |  |  |  |
| Experimental study of a simple refrigeration system on refrigeration tutor or an experimental set-up. (Comparison of actual and theoretical performance). |  |  |  |
| 14.   | Experimental study of an year-round air-conditioning system on an air-conditioning tutor or an experimental set-up. Determination of SHF and By-pass factor etc.                   |  |  |
| 15.   | Study and plotting of psychrometric processes using refrigeration/air-<br>conditioning tutor Measurement of psychrometric properties using<br>psychrometric meters/gadgets         |  |  |
| 16.   | Industrial exposure visit to refrigeration/air-conditioning plant.   |  |  |

|     | ested Readings  A Course in Refrigeration and air conditioning by Arora, S. C. and Domkundwar, S. |
|-----|---|
|     | Refrigeration and air conditioning by R.S. Khurmi   |
|     | Refrigeration and air conditioning by Prashad, M.   |
| 100 | Practical Manual on 'Refrigeration and Air Conditioning by S.S. Chopde                            |
|     | e course material   |

|                |                   | t of Dairy Engineering |                 |
|----------------|-------------------|------------------------|-----------------|
|                | TEACHING          | SCHEDULE (Vth Dean)    |                 |
| Course Title:  | Dairy Engineering | Course No.             | DE-309 (Theory) |
| Course Credit: | 2+1 = 3           | Semester               | III (V Dean)    |

| Lecture No.  | Topics   | Date |  |  |
|--|--|------|--|--|
| 1.   | Introduction to course and its overview, importance of course considering B. Tech (DT) program, Material used for dairy equipment  |      |  |  |
| 2  | Materials and sanitary features of the dairy equipment   |      |  |  |
| 2.   |  |      |  |  |
| 3.   | Sanitary pipes and fittings, standard glass piping, plastic tubing, fittings and gaskets,  |      |  |  |
| 4.   | Installation, care and maintenance of pipes & fittings   |      |  |  |
| 5.   | Description, working and maintenance of can washers, bottle washers.   |      |  |  |
| 6.   | Factors affecting washing operations, power requirements of can the bottle washers   |      |  |  |
| 7.   | CIP cleaning and designing of system   |      |  |  |
| 8.   | Mechanical Separation: Fundamentals involved in separation and sedimentation,  |      |  |  |
| 9.   | Principles involved in filtration, Types, rates of filtration, pressure drop calculations  |      |  |  |
| 10.  | Gravity settling, principles of centrifugal separation,  |      |  |  |
| 11.  | Different types of Centrifuges and their application in dairy industry   |      |  |  |
| 12.  | Clarifiers, Tri Processors, Cream Separator, Cold and hot separator  |      |  |  |
| 13.  | Self-desludging centrifuge, Bacto-fuge, care and maintenance of separators and clarifiers  |      |  |  |
| 14.  |  |      |  |  |
| 15.  | 15. Homogenizer valves   |      |  |  |
| 16.  |  |      |  |  |
| 17. Pasteurization: Batch, flash and continuous (HTST) pasteurizers, |  |      |  |  |
| 18.  | Heat regeneration concept and calculations   |      |  |  |
| 19.  | Flow diversion valve: Purpose and Types  |      |  |  |
| 20.  | Pasteurizer control, Care and maintenance of pasteurizers  |      |  |  |
| 21.  | Different type of sterilizers, in bottle sterilizers, autoclaves,  |      |  |  |
| 22.  | Continuous sterilization plant,  |      |  |  |
| 23.  | UHT sterilization  |      |  |  |
| 24.  | Aseptic packaging and equipment.   |      |  |  |
| 25.  | Care and maintenance of Sterilizers  |      |  |  |
| 26.  | Filling Operation: Principles and working of different types of bottle filters   |      |  |  |
| 27.  |  |      |  |  |
| 28.  | The state of the s |      |  |  |
| 29.  | Mixing and agitation: Theory and purpose of mixing.  |      |  |  |
| 30.  | Equipments used for mixing solids, liquids and gases   |      |  |  |
| 31.  | Different types of stirrers, paddles and agitators, Power consumption of mixer-impeller  |      |  |  |
| 32.  | Selection of mixing equipment in dairy industry, mixing pumps  |      |  |  |

|                | TEACHING          | SCHEDULE (V <sup>th</sup> Dean) |                    |

| Introduction to course and its overview, importance of course considering B.  |  |  |  |
|---|--|--|--|
| Tech (DT) program, Importance of evaporation and drying   |  |  |  |
| Evaporation: Basic principles of evaporators, construction and operation  |  |  |  |
|   |  |  |  |
| Different types of evaporators (Basket, rotary, horizontal, vertical, , plate type)   |  |  |  |
| Different types of evaporators used in dairy industry (Rising film, falling film,   |  |  |  |
|   |  |  |  |
|   |  |  |  |
|   |  |  |  |
| Multiple effect evaporator: Operation and various feeding system economy of   | are -  |  |  |
| operation boiling point elevation, steam consumption, Double and triple effect evaporator   |  |  |  |
| Numericals on multiple effect evaporators   |  |  |  |
| Thermo vapour compression   |  |  |  |
| Mechanical vapour compression   |  |  |  |
|   |  |  |  |
| Care and maintenance of evaporators   |  |  |  |
| Types of Condensers   |  |  |  |
| Drying: Introduction to principle of drying, Equilibrium moisture constant, bound and unbound moisture,   |  |  |  |
| Rate of drying- constant and falling rate, case hardening and effect of Shrinkage   |  |  |  |
| 16. Rate of drying- constant and falling rate, case hardening and effect of Shrinkage 17. Classification of dryers-spray and drum dryers, spray drying, etc., |  |  |  |
|   |  |  |  |
|   |  |  |  |
|   |  |  |  |
|   |  |  |  |
|   |  |  |  |
| Numerical on drum and spray drying  |  |  |  |
| Fluidization: Mechanisms of fluidization characteristics of gas-fluidization  |  |  |  |
| Fluidization bed Weight, Pressure drop in fluidized bed, Application of   |  |  |  |
| Mechanization and equipment used in manufacture of indigenous dairy   |  |  |  |
| Mechanization and equipment used in manufacture of indigenous dairy   |  |  |  |
|   |  |  |  |
|   |  |  |  |
|   |  |  |  |
|   |  |  |  |
|   |  |  |  |
|   |  |  |  |
| electro-dialysis.   |  |  |  |
|   | Tech (DT) program, Importance of evaporation and drying  Evaporation: Basic principles of evaporators, construction and operation  Different types of evaporators (Natural, forced, open, vaccum operated)  Different types of evaporators (Basket, rotary, horizontal, vertical,, plate type)  Different types of evaporators used in dairy industry (Rising film, falling film, single stage, multiple effect evaporator)  Calculation of heat transfer area  Water requirement of condensers  Multiple effect evaporator: Opeation and various feeding system, economy of operation boiling point elevation, steam consumption, Double and triple effect evaporator  Numericals on multiple effect evaporators  Thermo vapour compression  Mechanical vapour compression  Calculation of steam consumption in vacuum pan and double effect evaporators  Care and maintenance of evaporators  Types of Condensers  Drying: Introduction to principle of drying, Equilibrium moisture constant, bound and unbound moisture,  Rate of drying- constant and falling rate, case hardening and effect of Shrinkage  Classification of dryers-spray and drum dryers, spray drying, etc.,  Air heating systems, Atomization and feeding systems  Factors affecting bulk density of powder,  Spray dryer controls  Theory of solid gas separation, cyclone separators, Bag Filters,  Care and Maintenance of drum and spray dryers  Numerical on drum and spray drying  Fluidization: Mechanisms of fluidization characteristics of gas-fluidization systems, Minimum Porosity,  Fluidization bed Weight, Pressure drop in fluidized bed, Application of fluidization in drying, Batch fluidization, Fluidized bed dryers  Mechanization and equipment used in manufacture of indigenous dairy products  Mechanization and equipment used in manufacture of indigenous dairy products  Mechanization and equipment used in manufacture of indigenous dairy products  Mechanization and equipment used in manufacture of indigenous dairy products  Mechanization for milk & milk products  Membrane Processing: Ultra filtration, Re |  |  |

|   | TEACHING SCH | IEDULE (V <sup>th</sup> Dean) |             |
|---|--------------|-------------------------------|-------------|
| Course Title: Dairy Process Engineering Course No. DE-410 (Practical) |              |                               |             |
| Course Credit:  | 2+1 = 3      | Semester                      | IV (V Dean) |

| Practical No. | Topics   | Date |  |
|---------------|--|------|--|
| 1.            | Basic of evaporator and dehydration system                                     |      |  |
| 2.            | Construction details, operation and maintenance of Vacuum pan                  |      |  |
| 3.            |  |      |  |
| 4.            | Study of construction and operation of : Double effect evaporator              |      |  |
| 5.            | Construction details, operation and maintenance of Spray dryer                 |      |  |
| 6.            | Study of construction and operation of : Vacuum and atmospheric drum dryers    |      |  |
| 7.            | Construction details, operation and maintenance of Butter making equipments    |      |  |
| 8.            | Construction details, operation and maintenance of Ghee making equipments      |      |  |
| 9.            | Construction details, operation and maintenance of Ice-cream making equipments |      |  |
| 10.           | Construction details, operation and maintenance of cheese making equipments    |      |  |
| 11.           | Construction details, operation and maintenance of Reverse Osmosis system      |      |  |
| 12.           | Construction details, operation and maintenance of Ultra filtration system     |      |  |
| 13.           | Design problems on Double effect evaporator and Vacuum pan                     | F    |  |
| 14.           | Design problems on Triple effect evaporator                                    |      |  |
| 15.           | Design problems on Vaccum pan  |      |  |
| 16.           | Visit to a milk product plant.   |      |  |

| Lecture No. | Topics   | Date |  |  |
|-------------|--|------|--|--|
| 1.          | Basics of Instrumentation and process control and its application in the dairy and food industry   |      |  |  |
| 2.          | Instrumentation scheme & characteristics: Measurand Some basic discussion about electric field discussion about potential, capacitance, resistance etc |      |  |  |
| 3.          | Definition of measurements, application and types of measurements Instrument classification,   |      |  |  |
| 4.          | Functional elements of an instrument standards calibration   |      |  |  |
| 5.          | Introduction to static characteristics –I class  | W W  |  |  |
| 6.          | Introduction to static characteristics- II   |      |  |  |
| 7.          | Introduction to dynamics characteristics   |      |  |  |
| 8.          | Selection of instruments, loading effects.   |      |  |  |
| 9.          | Dynamic characteristics of measurement systems.  |      |  |  |
| 10.         | Introduction to various types of sensors: Definition, principle of sensing & transduction modes  |      |  |  |
| 11.         | Classification, selection and applications of Sensors.   |      |  |  |
| 12.         | Measurement of parameter: Measurement of length, angle, area, temperature,   |      |  |  |
| 13.         | Measurement of parameter : Temperature   |      |  |  |
| 14.         | Measurement of parameter : Pressure class- I   |      |  |  |
| 15.         | Measurement of parameter : Pressure class- II  |      |  |  |
| 16.         | Measurement of parameter : Flow & speed  |      |  |  |
| 17.         | Measurement of parameter: force, torque, vibration, level,   |      |  |  |
| 18.         | Measurement of parameter: Level  |      |  |  |
| 19.         | Measurement of parameter : Concentration (conductivity and ph) measurement   |      |  |  |
| 20.         | Flow measurement using magnetic flow measurement.  |      |  |  |
| 21.         | Piezoelectric transducer.  | 200  |  |  |
| 22.         | Micro-sensors: Construction, characteristics and applications  |      |  |  |
| 23.         | smart sensors: Construction, characteristics and applications  |      |  |  |
| 24.         | Electronic Instruments: Role and importance of general purpose test instruments, Electronic Millimeter, Cathode Ray Oscilloscope,                      |      |  |  |
| 25.         | Measurement of amplitude, frequency and phase using CRO Advantages of digital meter over analog meters   |      |  |  |
| 26.         | Study of Digital voltmeter   |      |  |  |
| 27.         | Study of Resolution and sensitivity of digital meters  |      |  |  |
| 28.         | Study of Digital multimeter, Digital frequency meter   |      |  |  |
| 29.         | Introduction to the Signal generator   |      |  |  |
| 30.         | Introduction to the Display devices  |      |  |  |
| 31.         | Introduction to the Recorders like X-Y & X-T recorders   |      |  |  |
| 32.         | Automation: Introduction to plant automation, automation hierarchy, PLC, SCADA   |      |  |  |

|   | TEACHING SCHEDUI | LE (V <sup>th</sup> Dean) |            |
|---|------------------|---------------------------|------------|
| Course Title: Instrumentation and Process Control Course No. DE-511 (Practical) |                  |                           |            |
| Course Credit:  | 2+1 = 3          | Semester                  | V (V Dean) |

| Practical No.   | Topics   | Date |
|---|--|------|
| 1.  | Study of Strain gauge characteristics and weight measurement.  |      |
| 2.  | Measurement of pressure using bellows and diaphragm.   |      |
| 3.  | Preparation and calibration of thermocouple.   |      |
| 4.  | Study the construction and working of Bourden pressure gauge.  |      |
| 5.  | Test and calibration of pressure gauges using dead weight tester.  |      |
| 6.  | Study the mechanism of pH meter and its electrodes.  |      |
| 7.  | Study of Proximity sensor.   |      |
| 8. Study of the different parts and working of pressure switch. |  |      |
| 9. Study of the different parts of an indicating instrument.    |  |      |
| 10.   | Study of RTD   |      |
| 11.   | Study of Thermister.   |      |
| 12.   | Study of different speed measurement sensor/ instruments.  |      |
| 13.   | Study of LVDT.   |      |
| 14.   | The state of the s |      |
| 15.   | Study of PLC.  |      |
| 16.   | Visit to a automatic controlled dairy plant.   |      |

| cture No.  | Topics   | Date |
|--|--|------|
| 1.   | Introduction to the food engineering and various unit operation in food industry   |      |
| 2. Introduction to concept of Rheology and its basics(Relation between force, deformation and time)            |  |      |
| 3.   | Rheology of processed food   |      |
| 4.   | Introduction to the Properties of fluid foods  |      |
| 5.   | Study of the various Rheological methods   |      |
| 6.   | Measurement of rheological parameters  |      |
| 7.   | Rheological Properties of granular food and properties of powders  |      |
| 8.   | Rheological Properties of solids foods   |      |
| 9.   | Rheological/Viscoelastic models.   |      |
| 10.  | Study of Kelvin model, Maxwell Model and Burger model  |      |
| 11.  | Measurement of food texture.   |      |
| 12.  | Introduction to the food freezing process and freezing curve   |      |
| 13.  | Thermal properties of frozen foods.  |      |
| 14.  | Predication of freezing rates & Plank's equation   |      |
| 15.  | Numerical on Plank's equation  |      |
| 16.  | Design of food freezing equipment (freezing rate, chamber size and total freezing time, capacity of refrigeration system etc.) |      |
| 17   | Design of Air blast freezers   |      |
| <ul> <li>17. Design of Air blast freezers</li> <li>18. Design of Plate freezers and spiral freezers</li> </ul> |  |      |
| 1.22   |  |      |
|  |  |      |
| <ul><li>20. Storage system of frozen foods.</li><li>21. Freeze concentration.</li></ul>                        |  |      |
| 22.  | Introduction to Food dehydration and water activity, EMC, Moisture content on wet basis and dry basis and forms of water.      |      |
| 23.  | Estimation of drying time for food products  |      |
| 24.  | Constant rate period and falling rate period dehydration   |      |
| 25.  | Diffusion controlled falling rate period.  |      |
| 26.  | Use of heat and mass balanced in analysis of continuous dryers   |      |
| 27.  | Classification of driers, tray, vacuum, vacuum band, tunnel, bin, solar, drying, freeze drying, spin flash.                    |      |
| 28.  | Freeze dehydration: Heat and mass transfer and Calculation of drying time  |      |
| 29.  | Freeze dehydration: Freezer dryer components and Industrial freeze drying  |      |
| 30.  | Study of food processing operations and equipments: Equipment for pulping, fruit juice extraction                              |      |
| 31.  | 44 44 44 44 44   |      |
| 32.  | Study of food processing operations and equipments: Milling, extrusion and distillation.                                       |      |

|                | TEACHING S       | CHEDULE (V <sup>th</sup> Dean) |                    |
|----------------|------------------|--------------------------------|--------------------|
| Course Title:  | Food Engineering | Course No.                     | DE-612 (Practical) |
| Course Credit: | 2+1 = 3          | Semester                       | VI (V Dean)        |

| Practical No. | Topics   |  |
|---------------|--|--|
| 1.            | To determine physical properties of food product.        |  |
| 2.            | To determine viscosity of food product.                  |  |
| 3.            | To study batch food freezers.                            |  |
| 4.            | To study continuous food freezers.                       |  |
| 5.            | Study of designing of freezer.                           |  |
| 6.            | To study tray dryer.                                     |  |
| 7.            | To study freeze dryer.                                   |  |
| 8.            | Numerical on food dehydration                            |  |
| 9.            | To determine drying characteristics of food product.     |  |
| 10.           | To compare various drying methods.                       |  |
| 11.           | To determination juice yield.                            |  |
| 12.           | To compare hot water and steam blanching                 |  |
| 13.           | To study construction and working of distillation system |  |
| 14.           | To study various size reduction equipments.              |  |
| 15.           | Visit to cold storage.                                   |  |
| 16.           | Visit to food processing plant.                          |  |

| ecture No. | Topics   | Date |
|------------|--|------|
| 1.         | Introduction to the Material Strength & Dairy Machine Design and its application dairy equipment designing |      |
| 2.         | Introduction to Strength of Materials: Basic concepts in Statics and Dynamics.                             |      |
| 3.         | Study of Force Systems.  |      |
| 4.         | Study of Equilibrium condition, friction and Law of friction.  |      |
| 5.         | Study of Second moments of inertia and Parallel axis theorem.  |      |
| 6.         | Numerical of Second moments of inertia and Parallel axis theorem.  |      |
| 7.         | Introduction to the Dynamics: Equation of motion.  |      |
| 8.         | Study of Translation and rotation of a Rigid body,   |      |
| 9.         | Introduction to the work and mechanics of materials  |      |
| 10.        | Study of Stress-Axial Load classification and Strain-Hooke's law   |      |
| 11.        | Study of stress-strain diagram   |      |
| 12.        | Study of Poisson's Ratio and Shearing Stresses   |      |
| 13.        | Study of Torsion, Torsion formula, Angle to Twist of circular members.                                     |      |
| 14.        | Numerical on torsion formula   |      |
| 15.        | Study of Power transmission, shear force and bending moments and Shear in Beams.                           |      |
| 16.        | Study of Pure bending of beams, Flexural stress shearing stresses in beams relations between centre,       |      |
| 17.        | Torsional and flexural loads   |      |
| 18.        | Dairy Machine Design: Procedures   |      |
| 19.        | Dairy Machine Design: Specification and strength,  |      |
| 20.        | Dairy Machine Design: design factor, factor of safety selection of factor of                               |      |
| - 10       | safety.  |      |
| 21.        | Study of Materials selection.  |      |
| 22.        | Static strength, ductility, hardness, fatigue, designing for fatigue conditions.                           |      |
| 23.        | Study of Properties of Static strength, ductility, hardness, fatigue, designing for fatigue conditions.    |      |
| 24.        | Theories of failure, Stresses in elementary machine parts,   |      |
| 25.        | Numerical on basics of mechanics (behaviour of material under stress)                                      |      |
| 26.        | Study of Design of a drive system.   |      |
| 27.        | Study of Design of length and thickness of belt.   |      |
| 28.        | Bearing: Journal and Anti-friction bearings.   |      |
| 29.        | Selection of ball, tapered roller and thrust bearing.  |      |
| 30.        | Study of Springs, helical and leaf springs.  | 7.50 |
| 31.        | Energy stored in springs.  |      |
| 32.        | Design and selection of springs.   |      |

| TEACHING SCHEDULE (Vth Dean)   |         |          |             |  |
|--|---------|----------|-------------|--|
| Course Title: Material Strength & Dairy Machine Design Course No. DE-613 (Practical Course No. DE-613) |         |          |             |  |
| Course Credit:   | 2+1 = 3 | Semester | VI (V Dean) |  |

| Practical No. | Topics   |  |  |
|---------------|--|--|--|
| 1.            | Design problems on applications of engineering statics and dynamics.                       |  |  |
| 2.            | Design problems on applications of work and energy.  |  |  |
| 3.            | Design problems on applications of linear and angular momentum.                            |  |  |
| 4.            | Design problems on stress-strain diagram evaluation of elastic constants.                  |  |  |
| 5.            | Study on shear force and bending moment diagrams and its applications.                     |  |  |
| 6.            | Design problems on applications of flexural stresses.                                      |  |  |
| 7.            | Design problems on applications of shearing stresses in beams.                             |  |  |
| 8.            | Study on system of limits, fits and tolerances and their applications.                     |  |  |
| 9.            | Design stresses in elementary machine parts.   |  |  |
| 10.           | Design features and applications of shafts.  |  |  |
| 11.           | Design features and applications of axles.   |  |  |
| 12.           | Design features and applications of keys.  |  |  |
| 13.           | Design features and applications of couplings.   |  |  |
| 14.           | Design problems on various types of power transmission systems.                            |  |  |
| 15.           | Design features and applications of bearings. Design features and applications of springs. |  |  |
| 16.           | Design problems on agitator/stirrer. Design features of milk silo.                         |  |  |

| Suggested Readings                              |        |
|---|--------|
| Principles of Dairy Machine Design by S. Ravi K | Lumar  |
| Machine Design By Dr. N. C. Pandya & Dr. C. S   | . Shah |
| A Textbook of Machine Design by R.S. Khurmi     |        |
| Strength-of-material-by R K Bansal              |        |
| Engineering Mechanics of Solids By Egor P. Por  | 00V    |

| TEACHING SCHEDULE (Vth Dean) |                               |            |                 |  |
|------------------------------|-------------------------------|------------|-----------------|--|
| Course Title:                | Dairy Plant Design and Layout | Course No. | DE-614 (Theory) |  |
| Course Credit:               | 1+1 = 2                       | Semester   | VI (V Dean)     |  |

| Practical No. | Topics  |      |  |
|---------------|---|------|--|
| 1.            | Introduction of Dairy Plant design and layout Type of dairies, perishable nature of milk, reception flexibility Classification of dairy plants                            |      |  |
| 2.            | Study of Location of plant, location problems, selection of site.   |      |  |
| 3.            | Hygienic design considerations for dairy processing plants.   |      |  |
| 4.            | Planning: Dairy building planning and Process schedule  |      |  |
| 5.            | Study of factors affecting dairy layout   | 8=11 |  |
| 6.            | Importance of planning and principles of dairy layout   |      |  |
| 7.            | Study of Space requirements for dairy plants  |      |  |
| 8.            | Estimation of service requirements including peak load consideration.   |      |  |
| 9.            | Dairy plant design aspects: General points of considerations for designing dairy plant, floor plant types of layouts, service accommodation, single or multilevel design. |      |  |
| 10.           | Arrangement of different sections in dairy, sitting the process sections, utility/service sections, offices and workshop.   |      |  |
| 11.           | Arrangement of equipment, milk piping, material handling in dairies,<br>Common problems, office layouts-flexibility.  |      |  |
| 12.           | Development and presentation of layout, model planning, use of planning table in developing plot plant and detailed layout  |      |  |
| 13.           | Building construction materials: Floors, general requirement of dairy floor finishes, floors for different section of dairy. Foundations, walls doors and windows.        |      |  |
| 14.           | Design aspects: Drains and drain layout for small and large dairies.  |      |  |
| 15.           | Study of building Ventilation, fly control, mold prevention, illumination in dairy plants   |      |  |
| 16.           | Computer aided Design: Introduction to CAD software.  |      |  |

|                | TEACHING SCHEDI               | JLE (V <sup>th</sup> Dean) |                    |
|----------------|-------------------------------|----------------------------|--------------------|
| Course Title:  | Dairy Plant Design and Layout | Course No.                 | DE-614 (Practical) |
| Course Credit: | 1+1 = 2                       | Semester                   | VI (V Dean)        |

| Practical No. | Topics  | Date |
|---------------|---|------|
| 1.            | Building symbols and convention.  |      |
| 2.            | Symbols for equipments  |      |
| 3.            | Study of process schedule.  |      |
| 4.            | To draw layout of collection/chilling centre.                                       |      |
| 5.            | Visit to dairy processing plant for understanding of layout of different sections.  |      |
| 6.            | To draw layout of small dairy plant.  |      |
| 7.            | To draw layout of small dairy plant using CAD                                       |      |
| 8.            | To draw layout of medium dairy plant  |      |
| 9.            | To draw layout of large dairy plant   |      |
| 10.           | To draw layout of cheese plant.   |      |
| 11.           | To draw layout of ice-cream plant.  |      |
| 12.           | To draw layout of butter manufacturing unit.  |      |
| 13.           | To draw layout of ghee plant.   |      |
| 14.           | To draw layout of composite dairy plant   |      |
| 15.           | To determine the capacity of utility generating devices.                            |      |
| 16.           | To determine the capacity of various basics dairy equipments for the given capacity |      |

| Course Title: Energy Conservation & Management Course No. DE-615 (Theory) |  |  |          |             |  |
| Course Credit:  |  |  | Semester | VI (V Dean) |  |

| ractical No.  | Topics   | Date |
|---|--|------|
| 1.  | Introduction: Potential and opportunities of industrial energy conservation in dairy and food processing. Energy conservation Act 2001 and its important features, Schemes of Bureau of Energy Efficiency (BEE).   |      |
| 2. Electricity Act 2003, Integrated energy policy. Energy management & audit: Definition, energy audit, need, types of energy audit. Energy audit approach-understanding energy costs, bench marking, energy performance, matching energy use to requirement, maximizing system efficiencies, optimizing the input energy requirements, fuel and energy substitution. Energy balances and computation of efficiencies of equipment. |  |      |
| 3.  | Role of Energy inspectors and Auditors in energy management.   |      |
| 4.  | Electrical load management: Demand management, energy management information systems, Energy saving controllers and cost saving techniques. Quality of power, Power factor and its improvement.  |      |
| 5.  | Transformers, losses in transformers. Energy savings in transformers.  |      |
| 6.  | Electric motor-selection and application, Energy efficient motors. Variable Speed Drives and Variable Frequency Drives (VFD) and their role in saving electric energy.   |      |
| 7.  | Bureau of Energy Efficiency (BEE): Power saving guide with "Star Ratings" of electrical appliances: Induction Motors, Air conditioners, Refrigerators and Water Heaters. Industrial Lighting: Quality of light, types of light sources, energy efficiency, Light controls.                                     |      |
| 8.  | High efficiency boilers, improved combustion techniques for energy conservation, Fluidized Bed Combustion and multi fuel capabilities.   |      |
| 9.  | Energy conservation in steam distribution systems, efficient piping layouts, protective & insulation coverings in utility pipes. Steam conservation opportunities. Upkeep and maintenance of steam auxiliaries and fittings.   |      |
| 10.   | . Energy conservation in Refrigeration and AC systems (HVAC), Cooling towers, Pumps and pumping systems, Fans, Blowers, Air compressors. Maintenance and upkeep of Vacuum lines and Compressed air pipe lines.   |      |
| 11.   | Conservation and reuse of water, water auditing. Energy conservation opportunities in Wastewater treatment.  |      |
| 12.   | Processing equipments: Improving efficiency and energy conservation opportunities in few important food processing operations like Thermal processes, Evaporation, Drying & Freezing. Role of steam traps in energy saving. Energy Savings methods in hot air generator, Thermic fluid heater, Steam radiator. |      |
| 13.   | Energy conservation in buildings: Concepts of "Green Buildings". Waste-heat recovery and thermal energy storage in food processing facilities. Condensate recovery and reuse. Application of recuparator to recover energy from flue gases from boiler, DG exhaust, hot air from spray dryer, FBD etc.         |      |
| Diesel generating sets (stand by AC Gen sets): Energy saving opportunities in DC sets, Fuel and Oil conservation; important regular maintenance aspects.  |  |      |
| 15.   | Carbon credits and carbon trade: Concepts of CDM, economic and societal benefits.  |      |
| 16.   | Cleaner energy sources: Introduction to Solar, and Bio-mass Energy; Solar thermal and photo-voltaic energy options for food processing industries. Role of automation in conservation of energy in dairy and food processing: Incorporation of enhanced PLC based computer controls and SCADA.                 |      |

| Practical No.   | Topics  | Date |  |
|---|---|------|--|
| 1.  | 1. Study of Energy Conservation Act, 2001   |      |  |
| 2.  | Study of schemes of BEE   |      |  |
| 3.  | Study of concepts of Energy Balance in Unit Operations and System boundaries.   |      |  |
| 4.  | Solving examples on energy balances.  |      |  |
| 5.  | Solving problems on electrical energy   |      |  |
| 6.  | Use and management: Connected load, Maximum demand, Demand factor and Load curve.   |      |  |
| 7.  | Determination of Load factor of an installation.  |      |  |
| 8.  | Study of use of power factor meter and determination of true power and wattles power using pf meters, Watt meter, Ammeter and Volt meter. |      |  |
| 9.  | Study of performances of a general type of induction motor and an energy efficient induction motor.                                       |      |  |
| 10.   | Study of use of VSD.  |      |  |
| 11.   | Study of various types of electrical appliances classified under different BEE Star Ratings.  |      |  |
| <ul> <li>Drawing Energy Balance on a boiler: Collection of data, Analysis of and determination of efficiency.</li> <li>Exercise on energy audit of Students Training Dairy Plant</li> </ul> |   |      |  |
|   |   |      |  |
| 14.   | Study on solar water heater   |      |  |
| 15.   | Study of Bio-gas plant.   |      |  |
| 16.   | Study of energy conservation in refrigeration system.   |      |  |

| TEACHING SCHEDULE (Vth Dean)  |         |          |             |  |  |
|---|---------|----------|-------------|--|--|
| Course Title: Physical Chemistry of Milk Course No. DC 202 (Theory) |         |          |             |  |  |
| Course Credit:  | 3 (2+1) | Semester | II (V Dean) |  |  |

| Lecture No. Topics |  | Date |  |  |
|--------------------|--|------|--|--|
| 1.                 | Definition and Composition of milk, Major and Minor constituents of milk   |      |  |  |
| 2.                 | Collides: Classification of colloids on the basis of the physical state of dispersed phase and   |      |  |  |
|                    | dispersion medium, Differences between the lyophyllic and lyophobic colloids, True and   |      |  |  |
| T FASTELING        | Colloidal Solutions  |      |  |  |
| 3.                 | Milk as a colloidal system, Stability of the colloidal system in milk, Properties of colloidal   |      |  |  |
|                    | system, Sedimentation and Coagulation of Colloidal System  | 7.   |  |  |
| 4.                 | Emulsions: Properties of Emulsions, Types of Emulsions, Functional Attributes of Food  |      |  |  |
|                    | Emulsions, Physical Properties of Emulsions.   |      |  |  |
| 5.                 | Gels: Definition and Types of Gels, Properties of Gels   |      |  |  |
| 6.                 | Density and Specific Gravity: Definition, Difference Between the Density and Specific  |      |  |  |
|                    | Gravity, Methods for the Determination of the Density and Specific Gravity of Milk   |      |  |  |
| 7.                 | Factor affecting density and specific gravity of milk: Recknagel phenomenon  |      |  |  |
| 8.                 | Liquid state: surface tension Definition and Concept of Surface Tension, Interfacial   |      |  |  |
|                    | tension, Factors influencing surface tension determination of milk   |      |  |  |
| 9.                 | Viscosity: Definition of Viscosity and its Units Types and Forms of Viscosity newtonian,   |      |  |  |
|                    | and non-newtonian behavior of fluids, Stoke's Law  | -    |  |  |
| 10.                | Viscosity of milk, Factors Influencing the Viscosity of Milk, Determination of Viscosity   |      |  |  |
| 11.                | Colligative properties of dilute solution: Concept and Definition  |      |  |  |
| 12.                | Colligative properties of dilute solutions: Raoult's Law, Lowering of Vapour Pressure  |      |  |  |
| 13.                | Colligative properties of dilute solutions: Boiling Point, Freezing Point  |      |  |  |
| 14.                | Electrolytes and non electrolytes, ionic mobility: Definition, Electrolytes Dissociation,  |      |  |  |
|                    | Arrhenius Theory, Theory of Electrolytic Dissociation, Ionic Mobility  |      |  |  |
| 15.                | Kohlrawsch law, ostwald's dilution, Limitation of Ostwald's Dilution Law law and electric  |      |  |  |
|                    | conductance of milk  |      |  |  |
| 16.                | Ionic equilibrium dissociation of ionic product of water: Dissociation of Water  |      |  |  |
| 17.                | pH and pOH scales: Definition, Comparison of the pH and pOH of acidity   |      |  |  |
| 18.                | Acid and Bases: Lewis concepts of acids, Lewis bases, Bronsted - Lowry Concept,  |      |  |  |
| 19.                | Dissociation constants of acids and bases, Dissociation Constant, Definition for Acids and Bases, Reaction of Acid and Bases with Water.   |      |  |  |
| 20.                | Acidity of milk: Titratable acidity and pH of milk, Types of Acidity, Methods of   |      |  |  |
|                    | Determination of Acidity of Milk, Importance of Acidity of Milk  |      |  |  |
| 21.                | Salts and their hydrolysis: Definition of Salt, Hydrolysis of Salts, Neutralization, Types of  |      |  |  |
|                    | Combinations for the Salt Formation  |      |  |  |
| 22.                | Buffers: Definition, types of buffer solutions, solutions of single substance of mixture,  |      |  |  |
|                    | Importance of Buffers  |      |  |  |
| 23.                | Derivations of henderson and hasselbalch equation  |      |  |  |
| 24.                | Buffering capacity and buffering index   |      |  |  |
| 25.                | Electrolyte equilibrium and ph indicators  |      |  |  |
| 26.                | Oxidation reduction potential, Nernst equation and electrochemical cell  |      |  |  |
| 27.                | Redox system in milk   |      |  |  |
| 28.                | Nuclear chemistry, isotopes  |      |  |  |
| 29.                | Half life period of radio isotopes and measurement of radio activity   |      |  |  |
| 30.                | Occurrence of radio nuclides in milk products, Source of Radio Nuclides in Milk, Common Radio Nuclides Found in Milk, Distribution of radio-nuclides in milk and their half life |      |  |  |
| 31.                | Spectrum of electromagnetic radiation: Classification of Electromagnetic Radiation, Electromagnetic Specturm, Lambert-Beer Law, Nuclear Magnetic Resonance                       |      |  |  |
| 32.                | Visible and ultraviolet spectrophotometer: Principle of Spectrophometers, Milk and Dairy Applications  |      |  |  |

| Department of During Chamberry |                            |                                |                    |  |

| Course Credit:                 | 3 (2+1)                    | Semester                       | II (V Dean)        |  |

| Practical No.   | Topics  | Date |
|---|---|------|
| 1.  | Determination of density and specific gravity of milk using pycnometer, hydrometer and lactometer |      |
| 2.  | Determination of density and specific gravity of milk using hydrometer and lactometer             |      |
| 3.  | Determination of viscosity of milk using Ostwald viscometer                                       |      |
| 4.  | Determination of surface tension of milk using Stalagmometer                                      |      |
| 5.  | Determination of Interfacial between water and oil phase  |      |
| 6.  | Determination of freezing point of milk   |      |
| 7.  | 7. Preparation of buffer solution   |      |
| 8. Determination pH of buffer solution and milk electrometrically |   |      |
| 9.  | Determination of acidity of milk titrimetrically  |      |
| 10.   | Determination of electrical conductance of milk   |      |
| 11.   | Determination of redox potential of milk  | 100  |
| 12.   | Coagulation of milk using electrolytes  |      |
| 13.   | Determination of refractive index of skim milk and whey   |      |
| 14.   | Titration of amino acid in the presence and absence of formaldehyde                               |      |
| 15.   | Determination of pKa and pI value of amino acid (glycine)   |      |
| 16.   | Verification of Lambert Beer Law  |      |

|--|-----------------------------|------------|-----------------|--|
| Course Title:                            | Chemistry of Dairy Products | Course No. | DC-405 (Theory) |  |
| Course Credit:                           | 2+1 = 3                     | Semester   | IV (V Dean)     |  |

| Lecture No. | Topics  | Date |  |
|-------------|---|------|--|
| 1           | Chemical composition of milk products.  |      |  |
| 2.          | Legal standards of milk products.   |      |  |
| 3.          | Chemistry of creaming and factors affecting the same.   |      |  |
| 4.          | Ripening and neutralization of cream.   |      |  |
| 5.          | Theories of churning and factors affecting the churning   |      |  |
| 6.          | Butter colour.  |      |  |
| 7.          | Ghee: Physico-chemical changes during manufacture.  |      |  |
| 8.          | Physico-chemical constant of milk fat   |      |  |
| 9.          | Hydrolytic deterioration of milk lipids, their causes, prevention   |      |  |
| 10.         | Oxidative deterioration of milk lipids, their causes, prevention  |      |  |
| 11.         | Role of antioxidants.   |      |  |
| 12.         | Physico-chemical changes in milk constituents during manufacture of traditional dairy products: Khoa,                   |      |  |
| 13.         | Physico-chemical changes in milk constituents during storage of traditional dairy products: Khoa and khoa based sweets. |      |  |
| 14.         | Physico-chemical changes in milk constituents during manufacture of traditional dairy products: Paneer and Channa,      |      |  |
| 15.         | Physico-chemical changes in milk constituents during storage of traditional dairy products: Paneer and Channa           |      |  |
| 16.         | Physico-chemical changes in milk constituents during manufacture of traditional dairy products: Dahi and Lassi,         |      |  |
| 17.         | Physico-chemical changes in milk constituents during storage of traditional dairy products: Dahi and Lassi,             |      |  |
| 18.         | Physico-chemical changes in milk constituents during manufacture of traditional dairy products: Chakka and Shrikhand    |      |  |
| 19.         | Physico-chemical changes in milk constituents during storage of traditional dairy products: Chakka and Shrikhand        |      |  |
| 20.         | Physico-chemical changes during preparation of cheese   |      |  |
| 21.         | Milk clotting enzymes   |      |  |
| 22.         | Enzymatic coagulation of milk   |      |  |
| 23.         | Biochemical changes during ripening   |      |  |
| 24.         | Heat stability of milk  |      |  |
| 25.         | Physico-chemical changes during preparation of concentrated (SCM and Evaporated milk) milk products                     |      |  |
| 26.         | Physico-chemical changes during storage of concentrated (SCM and  |      |  |
| 27.         | Evaporated milk) milk products  Physical charges during propagation of dried milk products                              |      |  |
|             | Physico-chemical changes during preparation of dried milk products  |      |  |
| 28.         | Physico-chemical changes during storage of dried milk products  |      |  |
| 29.         | Physico-chemical changes during processing of ice cream and frozen desserts   |      |  |
| 30.         | Physico-chemical changes during storage of ice cream and frozen desserts  |      |  |
| 31.         | Role of stabilizers and emulsifiers in ice cream  |      |  |
| 32.         | Mechanism of stabilizers and emulsifiers in ice cream   |      |  |

|                 | Citominut                 |                    |
|-----------------|---------------------------|--------------------|
| TEACHING SCHEDU | LE (V <sup>th</sup> Dean) |                    |
|                 |                           | DC-405 (Practical) |
|                 | Semester                  | IV (V Dean)        |
|                 |                           | Chombay of 2 may 1 |

| Practical No. | Topics  | Date |
|---------------|---|------|
| 1.            | Estimation of fat and acidityof Cream.  |      |
| 2.            | Estimation of fat and moisture content in Butter                                    |      |
| 3.            | Estimation of curd and salt content of Butter                                       |      |
| 4.            | Estimation of moisture, acid value and Butyro-refractive reading of Ghee            |      |
| 5.            | Estimation of Reichert Meissl value and Polenske value of Ghee                      |      |
| 6.            | Determination of lactose in sweetened condensed milk.                               |      |
| 7.            | Determination of sucrose in sweetened condensed milk.                               |      |
| 8.            | Estimation of moisture and fat content of Milk powder                               |      |
| 9.            | Estimation of acidity and ash content of Milk powder                                |      |
| 10.           | Estimation of solubility and bulk density of Milk powder                            |      |
| 11.           | Estimation of fat and total solids of Ice cream                                     |      |
| 12.           | Estimation of moisture, fat and salt content in cheese.                             |      |
| 13.           | Estimation of moisture and fat content of Khoa.                                     |      |
| 14.           | Estimation of moisture and fat content in paneer and channa.                        |      |
| 15.           | Estimation of protein content in milk products using Kjeldahl method.               |      |
| 16.           | Estimation of protein content in protein rich dairy products using Kjeldahl method. |      |

| Sugg | ested Readings   |
|------|--|
| 1.   | Principles of dairy chemistry by R. Jenness and S. Patton  |
| 2.   | Physics, Chemistry of milk by- P. Walstra and R. Jenness   |
| 3.   | A Text book of dairy chemistry by E. Ling  |
| 4.   | Fundamentals of dairy chemistry by Web Jonson  |
| 5.   | Fundamentals of dairy chemistry by – Wong  |
| 6.   | Chemistry and testing of dairy products by- A.V. Atherton and J.A. Newlander   |
| 7.   | Buffalo milk chemistry and Technology by Deepak Sahai  |
| 8.   | Milk and Dairy Products as Functional Foods. A. Kanekanian. John Wiley & Sons, Ltd., UK                                |
| 9.   | Milk Processing and Quality Management. Adnan Y. Tamime. Blackwell Publishing Ltd., UK                                 |
| 10.  | Dairy Science and Technology, Pieter Walstra, Jan T.M. Wouters, Tom J. Geurts., 2nd Ed. CRC Press. Boca Raton, FL. USA |
| 11.  | Outlines of Dairy Technology, Sukumar De, Oxford University Press, New Delhi   |
| 12.  | Dairy Science and Technology Handbook, Vol. I, II and III. Y.H. Hui. 1993. Wiley-VCH, USA.                             |
| 13.  | Textbook of dairy chemistry, by M. P. Mathur   |
| 14.  | Cheese and Fermented milk foods, Frank Kosikowski  |
| 15.  | Condensed and dried dairy products, Marijana and Caric   |
| 16.  | Milk and Milk products technology, Edger and Speer   |
| 17   | Dairy Chemistry and Biochemistry, by P. F. Fox   |

| TEACHING SCHEDULE (V <sup>th</sup> Dean)                            |         |          |            |
|---|---------|----------|------------|
| Course Title: Chemical Quality Assurance Course No. DC- 506(Theory) |         |          |            |
| Course Credit:  | 2+1 = 3 | Semester | V (V Dean) |

| Lecture No. | Topics  | Date |  |
|-------------|---|------|--|
| 1.          | Importance of chemical quality control  | 1847 |  |
| 2.          | Importance of quality assurance   |      |  |
| 3.          | Importance of total quality management  |      |  |
| 4.          | Importance of total quality management in dairy industry  |      |  |
|             | 5. Role of national food regulatory systems and standards with respect to quality of milk and milk products: FSSAI and PFA        |      |  |
| 6.          | Role of national food regulatory systems and standards with respect to safety of milk and milk products: AGMARK and BIS           |      |  |
| 7.          | Role of international food regulatory systems and standards with respect to quality of milk and milk products: ISO                |      |  |
| 8.          | Role of international food regulatory systems and standards with respect to safety of milk and milk products: IDF and Codex, etc. |      |  |
| 9.          | Application of food safety management system (ISO: 22000) Part I  |      |  |
| 10.         | Application of food safety management system (ISO: 22000) Part II   |      |  |
| 11.         | Hazard analysis and critical control points (HACCP) system  |      |  |
| 12.         | Hazard analysis and critical control points (HACCP) system application in dairy industry with respect to chemical quality.        |      |  |
| 13.         | Setting up quality control laboratories and testing facilities  |      |  |
| 14.         | Mobile testing laboratories.  |      |  |
| 15.         | Accreditation of analytical laboratories.   |      |  |
| 16.         | Preparation and standardization of reagents required in the analysis of milk and milk products. Part I                            |      |  |
| 17.         | Preparation and standardization of reagents required in the analysis of milk and milk products. Part II                           |      |  |
| 18.         | Preparation and standardization of reagents required in the analysis of milk and milk products. Part III                          |      |  |
| 19.         | Sampling procedures   |      |  |
| 20.         | Sampling and labeling of samples for analysis   |      |  |
| 21.         | Choice of analytical tests for milk and milk products for chemical analysis and instrumental methods of analysis.                 |      |  |
| 22.         | Calibration of dairy glassware Butyrometer, pipettes,   |      |  |
| 23.         | Calibration of dairy glassware hydrometers, lactometers   |      |  |
| 24.         | Calibration of dairy burettes, Freezing point thermometer   |      |  |
| 25.         | Testing methods for the detection of adulterants in milk and milk products.   |      |  |
| 26.         | Testing methods for the detection of preservatives in milk and milk products.   |      |  |
| 27.         | Testing methods for the detection of neutralizers in milk and milk products.  |      |  |
| 28.         | Environmental contaminants such as pesticides, antibiotics  |      |  |
| 29.         | Environmental contaminants such as heavy metals in dairy products   |      |  |
| 30.         | Importance of milk contact surfaces, metallic contamination in dairy industry   |      |  |
| 31.         | Chemical quality of water in dairy industry.  |      |  |
| 32.         | Prediction of shelf life behavior of milk and milk products.  |      |  |

|                | TEACHING SCHEDU            |          |                   |
|----------------|----------------------------|----------|-------------------|
|                |                            |          | DC-506(Practical) |
| Course Title:  | Chemical Quality Assurance |          |                   |
| Course Credit: | 2+1 = 3                    | Semester | V (V Dean)        |

| Practical No. | Topics  | Date |
|---------------|---|------|
| 1.            | Calibration of Pipette and Burette  |      |
| 2.            | Calibration of Volumetric Flasks and Hydrometer   |      |
| 3.            | Calibration of Butyrometer and Thermometer  |      |
| 4.            | Preparation and standardization of Sulphuric acid (H <sub>2</sub> S0 <sub>4</sub> ) and Hydrochloric acid (HCL)                     |      |
| 5.            | Preparation and standardization of Sodium Hydroxide (NaOH) and Sodium Thiosulphate (Na <sub>2</sub> S <sub>2</sub> O <sub>3</sub> ) |      |
| 6.            | Preparation and standardization of Silver Nitrate (AgN0 <sub>3</sub> ) and EDTA solution  |      |
| 7.            | Preparation and standardization of Fehling's solution   |      |
| 8.            | Preparation and testing of Gerber H <sub>2</sub> SO <sub>4</sub> used in fat determination  |      |
| 9.            | Testing the Amyl Alcohol used for fat determination.  |      |
| 10.           | Chemical analysis of permissible additives used in milk and dairy products  |      |
| 11.           | Chemical analysis of detergents and sanitizers  |      |
| 12.           | Detection of adulterants, preservatives, and neutralizers in milk and milk products.  |      |
| 13.           | Detection of vegetable oils and animal body fat adulteration in ghee.   |      |
| 14.           | Analysis of market samples of milk and milk products.   |      |
| 15.           | Determination of temporary and permanent hardness of water  |      |
| 16.           | Estimation of available chlorine from bleaching powder  |      |

| 3.            | Determination of total ash and acid insoluble ash in flour.      |      |
| 4.            | Determination of starch in flour                                 |      |
| 5.            | Determination of total nitrogen in cereal products- Part 1       |      |
| 6.            | Determination of total nitrogen in cereal products- Part 2       |      |
| 7.            | Determination of acidity and vitamin C in citrus fruits.         |      |
| 8.            | Analysis of tomato ketchup for total solids and acidity          |      |
| 9.            | Analysis of tomato ketchup for ash and salt content              | 704  |
| 10.           | Determination of total sugar in tomato ketchup.                  |      |
| 11.           | Determination of total ash and alkalinity of soluble ash in tea. |      |
| 12.           | Determination of water extractive in tea leaves.                 |      |
| 13.           | Determination of presence of Chicory incoffee powder.            |      |
| 14.           | Determination of reducing sugars in Jam- Part 1                  |      |
| 15.           | Determination of reducing sugars in Jam- Part 2                  |      |
| 16.           | Determination of iron in infant foods.                           |      |

| Sugg | ested Readings   |
|------|--|
| 1.   | Food Chemistry by L.H. Mayer Acc.No. 2680                                    |
| 2.   | Foods facts and principal By N.S.Manay and M. Shalaksharaswamy Acc. No. 2595 |
| 3.   | Food Chemistry by Belitz and GroschAcc.No. 1546                              |
| 4.   | Food Chemistry by O.R.Fenema.(Book not available in library)                 |
| 5.   | E-Course NAIP-ICAR   |
| 6.   | Technology of food preservation by Norman W. Desrosier                       |
| 7.   | Food Science by Norman Potter  |
| 8.   | Chemical changes in food during processing by Richardson and Finley          |
| 9.   | Food toxicology by Taylor and Scanlan  |
| 10.  | Food proteins by P.F.Fox   |
| 11.  | Protein structure-function relationship in foods by Yada, Jackman and Smith  |
| 12.  | New methods of food preservation by G.W. Gould                               |
| 13.  | Food oils and fats by Harry Lawson   |
| 14.  | Lipid oxidation in food by Allan L. Anjielo                                  |

ANNEXURE No. IV
List of Teaching / Lecture Schedule Practical Schedule
Department of Dairy Microbiology

|                | TEACHING SCHE                | DULE (Vth Dean) |                 |
|----------------|------------------------------|-----------------|-----------------|
| Course Title:  | Fundamentals of Microbiology | Course No       | DM-101 (Theory) |
| Course Credit: | 3 (2+1)                      | Semester        | I (V Dean)      |

| ecture No. | Topics   | Date                  |
|------------|--|-----------------------|
| 1.         | Microbiology: history and scope  |                       |
| 2.         | Discovery of Microorganisms & Discovery of Microscopy  |                       |
| 3.         | Types, working principles of microscope and Applications of microscope & Theories of Biogenesis and abiogenesis  |                       |
| 4.         | Contributions of Contributions of Leeuwenhoek and Pasteur, Tyndal, Joseph Lister and Robert Koch,  |                       |
| 5.         | Contributions of Koch, Edward Jenner and Alexander Fleming Leeuwenhock,  |                       |
| 6.         | Scope and application of microbiology in fields like Dairy and Food, Pharmaceutical and Industrial, Medical and agriculture  |                       |
| 7.         | Classification of Microbes: Microbial classification systems and numerical taxonomy.   |                       |
| 8.         | General properties and principles of microbial classification  |                       |
| 9.         | Whittaker's five kingdom and Carl Woese's three domain classification system, Systematic of bacteria and Bergey's manual of systematic bacteriology, Phylogenetic tree |                       |
| 10.        | Procaryotic and Eucaryotic microorganisms:   |                       |
| 11.        | Structure and functions of prokaryotic cells; Differences between prokaryotes and cukaryotes   |                       |
| 12.        | Differences between cell wall of Gram positive and Gram negative bacteria, Structure of Archeal cell wall.   |                       |
| 13.        | Microbial growth and nutrition: Bacterial growth curve;  |                       |
| 14.        | Factors affecting growth of bacteria,  |                       |
| 15.        | Direct and indirect methods of measurement of bacterial growth;  |                       |
| 16.        | Common nutrient requirements and nutritional types of microorganisms.  |                       |
| 17.        | Diversity of Microorganisms: Viruses: Structure and Classification;  |                       |
| 18.        | Bacteriophages; Differences between viruses and bacteria;  |                       |
| 19.        | Fungi: Classification of Fungi; Reproduction in Fungi; Protozoa and algae.   |                       |
| 20.        | Microbial Ecology and Environmental Microbiology:  |                       |
| 21.        | Microflora of air  |                       |
| 22.        | Microflora soil and water  |                       |
| 23.        | Microbes of Extreme environment like Archea.   |                       |
| 24.        | Basics of Microbial Genetics and Host-Microbe interactions:  |                       |
| 25.        | DNA as the genetic material, Structure of DNA  |                       |
| 26.        | Structure of DNA   |                       |
| 27.        | DNA replication  |                       |
| 28.        | Transcription  |                       |
| 29.        | Translation  |                       |
| 30.        | Basic concepts of immunology   |                       |
| 31.        | Role of immune system in governing host-microbe interactions   | Total Control Control |
| 32.        | Microbial Commensalism, Colonization, Infection, Disease and Vaccines  |                       |

|                | Department of Dali           |                             |                    |

| Course Credit:   | 2 (1+1) | Semester | II (V Dean) |  |  |

| Lecture No. | Topics   | Date |
|-------------|--|------|
| 1.          | Microbes associated with raw milk: Significance of specific groups of microorganisms in milk i.e. psychrotrophic, mesophilic, thermoduric and thermophillic bacteria.  |      |
| 2.          | Morphological and biochemical characteristics and classification.  |      |
| 3.          | Their sources during various stages of production - milking, chilling, storage and transportation with special reference to psychrotrophic microorganisms.   |      |
| 4.          | Microbiological changes in bulk refrigerated raw milk.   |      |
| 5.          | Sources of contamination and microbial spoilage of raw milk  |      |
| 6.          | Types of microbial spoilage - souring, curdling, bitty cream, proteolysis, lipolysis, abnormal flavors and discolouration.   |      |
| 7.          | Mastitis milk - types of mastitis, causative micro-flora of mastitis. Compositional and microbiological changes during mastitis infection, their processing and public health                                |      |
| 8.          | Concept of clean milk production: Hygienic milk production system;<br>Cleaning and sanitation of udder, animal, utensils, equipments and dairy<br>farm environment;  |      |
| 9.          | Microbiological quality of milk produced in organized and un-organized sector in India and comparative information in developed world  |      |
| 10.         | Microflora of aseptically drawn milk and its natural antimicrobial systems - immunoglobulins, lactoferrin, lysozyme and lactoproxidase (LP) system.  |      |
| 11.         | Microbiological aspects of fluid milk: Pasteurization, boiling, sterilization, ultra high temperature (UHT), non thermal (pulsed field) micro-filtration, bactofugation, standardization and homogenization. |      |
| 12.         | Significance of heat resistant and post processing contaminants in fluid milk with special reference to proteases and lipase enzymes and their role in spoilage of processed milk.                           |      |
| 13.         | Bio-film formation during processing and their control measures.   |      |
| 14.         | Public health aspects of fluid milk: Microbial zoonotic diseases transmitted through fluid milk;   |      |
| 15.         | Milk borne diseases -food infection, intoxication and toxi- infection caused E. coli, Salmonella typhi, Staphylococcus aureus, Bacillus cereus, Listeria monocytogenes, Shigella species, Campylobacter etc. |      |
| 16.         | Microbiological grading and legal standards of raw and processed milk.   |      |

|                | Department of 2            |                              |                    |  |
|----------------|----------------------------|------------------------------|--------------------|--|
|                | TEACHING SCH               | EDULE (V <sup>th</sup> Dean) |                    |  |
| Course Title:  | Microbiology of Fluid Milk | Course No                    | DM-202 (Practical) |  |
| Course Credit: | 2 (1+1)                    | Semester                     | II (V Dean)        |  |

| Practical No. | Topics  | Date |
|---------------|---|------|
| 1.            | Morphological examination of common dairy microorganisms (size and shape, arrangement and sporulation).     |      |
| 2.            | Estimation of microbial load in raw milk by standard plate count (SPC).                                     |      |
| 3.            | Estimation of microbial load in raw milk by dye reduction tests (MBRT, RRT).                                |      |
| 4.            | Grading of processed / market milk by total viable count, coliform count and methylene blue reduction time. |      |
| 5.            | Enumeration of psychrotrophic bacteria in raw and market milk.  |      |
| 6.            | Enumeration of thermophillic bacteria in raw and market milk.   |      |
| 7.            | Enumeration of thermoduric bacteria in raw and market milk  |      |
| 8.            | Enumeration of spore forming bacteria in raw and market milk  |      |
| 9.            | Detection of sources of contamination: Air and water.   |      |
| 10.           | Detection of sources of contamination: utensils, equipment, personnel and line testing.                     |      |
| 11.           | Spoilage of milk caused by microorganisms: souring, sweet curdling, gassiness and discolouration.           |      |
| 12.           | Spoilage of milk caused by microorganisms: lipolysis, ropiness and proteolysis.                             |      |
| 13.           | Detection of mastitis milks: pH, SLST and somatic cell count.   |      |
| 14.           | Detection of mastitis milks: chloride content, Hotis test and CAMP test.                                    |      |
| 15.           | Detection and estimation of coliforms: presumptive, rapid coliform Test.                                    | 1 0  |
| 16.           | Detection and estimation of coliforms: IMViC Test.  |      |

| Course Title:  | Starter Cultures and Fermented Milk Products | Course No | DM-403 (Theory) |
| Course Credit: | 3 (2+1)                                      | Semester  | IV (V Dean)     |

| Lecture No.                             | D. Topics  |   |  |  |
|---|--|---|--|--|
| 1.                                      | History, classification and importance of starter cultures in dairy industry   |   |  |  |
| 2.                                      | Types, of starter cultures: Single, multiple, defined and mixed strain starters; Probiotics and Special cultures like exopolysaccharide production |   |  |  |
| 3.                                      | Metabolism of Lactic Acid Bacteria and diacetyl production   |   |  |  |
| 4.                                      |  |   |  |  |
| 5.                                      | Production of antibacterial substances by lactic starter cultures  |   |  |  |
| 6.                                      | Mixed and define strain starter culture  |   |  |  |
| 7.                                      | Propagation of starter cultures  |   |  |  |
| 8.                                      | chemical and mechanically protected systems of Propagation of starter cultures   |   |  |  |
| 9.                                      | Factors affecting propagation of starter cultures  |   |  |  |
| 10.                                     | Starter concentrates: direct bulk and direct vat starter cultures  |   |  |  |
| 11.                                     | Methods of starter distillates their merits/demerits.  |   |  |  |
| 12.                                     | Bacteriophages. Phages-life cycle, sources, prevention   |   |  |  |
| 13.                                     | Quality and activity of starter cultures   |   |  |  |
| 14.                                     | defects in starters and their control  |   |  |  |
| 15.                                     | starter failures; antibiotic residues, sanitizers and bacteriophages   | 1 |  |  |
| 16.                                     | Preservation of starter cultures: freezing and freeze-drying   |   |  |  |
| 17.                                     | Factors affecting the survival of cultures during preservation   |   |  |  |
| 18.                                     | Role of starter cultures in the preparation of various fermented milks   |   |  |  |
| 19.                                     | Classification of fermented milks: Microbiology of dahi and yoghurt  |   |  |  |
| 20.                                     | different types of dahi and yoghurt; preparation defects and their control   |   |  |  |
| 21.                                     | Microbiology of milk products; their nutritional and therapeutic significance  |   |  |  |
| 22.                                     | Kefir and Kumiss: origin and characteristics: microbiology of Kefir grains   |   |  |  |
| 23.                                     | Microbiology of other fermented milks such as Bugarian milk, cultured buttermilk; their significance   |   |  |  |
| 24.                                     | Microbiology of other fermented milks such as Leben and Yakult; their significance   |   |  |  |
| 25.                                     | Concept of probiotic starters  |   |  |  |
| 26.                                     | Application of probiotic dairy foods   |   |  |  |
| 27.                                     |  |   |  |  |
| 28.                                     | Primary and secondary flora of cheese  |   |  |  |
| 29. biochemical changes during ripening |  |   |  |  |
| 30.                                     |  |   |  |  |
| 31.                                     | soft, semi-soft, semi-hard, hard, Brick and Brie cheese, Camembert and Roquefort cheese  |   |  |  |
| 32.                                     | Rennet: rennet substitutes, microbial rennet and recombinant chymosin  |   |  |  |

|                              | Department of Dairy Wherob                   |          |                    |  |

| TEACHING SCHEDULE (Vth Dean) |  |          |                    |  |
| Course Title:                | Starter Cultures and Fermented Milk Products |          | DM-403 (Practical) |  |
| Course Credit:               |  | Semester | IV (V Dean)        |  |
| Course Cream.                | 13 (2 · - )                                  |          |                    |  |

| Practical No.  | Topics  | Date |  |
|--|---|------|--|
| 1.   | creatine test   |      |  |
| 2. Starter activity tests: die reduction tests, Horrall-Elliker test, Whitehead and Cox test   |   |      |  |
| 3.   | Preparation of single and mixed starter cultures.                                     |      |  |
| 4.   | Evaluation of homo-fermentation and hetero-fermentation separately and in combination |      |  |
| 5.   | Preservation of starter cultures by freeze-drying techniques                          |      |  |
| 6.   | Preparation of concentrated starter (DVS)   |      |  |
| 7. Effect of physical factors on dairy starter: temperature, pH, salt, sugar   |   |      |  |
| 8. Testing milk for the presence of inhibitory substance using B. stearothermophilus and S. thermophilus as indicator organisms  |   |      |  |
| 9. Effect of antibiotic residues in milk on starter activity   |   |      |  |
| 10. Associative growth Starter cultures in milk  |   |      |  |
| 11. Detection of bacteriophages in cheese whey by plaque assay   |   |      |  |
| 12. Preparation and microbial examination of dahi  |   |      |  |
| 13. Preparation and microbial examination of yoghurt   |   |      |  |
| 14. Preparation and microbial examination of cultured butter milk  |   |      |  |
| 15. Preparation and microbial examination of acidophilus milk and kefir  |   | 287  |  |
| 16. Analysis of cheese for total spore and anaerobic spore count Microbiological analysis of cheddar cheese at different stages of manufacture of (storage and ripening) |   |      |  |

|------|---|
|      | Fundamentals of Dairy Microbiology                                  |
|      | Comprehensive Dairy Microbiology                                    |
|      | Chemical & Microbiological Analysis of Milk & milk products         |
| V    | Dairy Microbiology Handbook (I, II & III edition)                   |
|      | Standard Methods for the Examination of Dairy Products              |
|      | Food Safety and Quality Assurance                                   |
|      | ICAR-NDRI e-course Notes- National Dairy Research Institute, Karnal |

|                | TEACHING SCHEI                 | DULE (Vth Dean) |                 |
|----------------|--------------------------------|-----------------|-----------------|
| Course Title:  | Microbiology of Dairy Products | Course No       | DM-404 (Theory) |
| Course Credit: | 2 (1+1)                        | Semester        | IV (V Dean)     |

| Lecture<br>No. | Topics   | Date  |  |  |
|----------------|--|-------|--|--|
| 1.             | Micro-environment and impact of critical process factors on entry of spoilage and pathogenic organisms in cream  |       |  |  |
| 2.             | Microbiological aspects including defects in pasteurized (ripened/unripened cream), sterilized and UHT cream   |       |  |  |
| 3.             | Micro-environment and impact of critical process factors on entry of spoilage and pathogenic organisms in butter   |       |  |  |
| 4.             | Factors influencing the microbial growth during batch/continuous butter making process   |       |  |  |
| 5.             | Microbial Defects in butter - Bacterial/mold discoloration, enzymatic deterioration and their control measures   |       |  |  |
| 6.             | Type of microorganisms associated with condensed milk, their growth/ survival during manufacture and storage   |       |  |  |
| 7.             | Microbial defects - Bacterial thickening / Mold button formation in SCM  |       |  |  |
| 8.             | Type of microorganisms associated with evaporated milk, their growth/ survival during manufacture and storage  |       |  |  |
| 9.             | Gassiness/bloating, Bacterial coagulation (Sour and sweet), Bitterness, Fishy flavor in evaporated milk  |       |  |  |
| 10.            | Type of microorganisms associated with dried products  | kur   |  |  |
| 11.            | pre-heating/DSI temperature and their impact on microflora of dried products;  | 10000 |  |  |
| 12.            | Effect of reconstitution on microbial quality of milk powder including baby foods and survivability of pathogens; Regulatory microbiological standards   |       |  |  |
| 13.            |  |       |  |  |
| 14.            | Predominance of spoilage and pathogenic organisms in khoa and khoa based sweets – burfi, peda, gulabjamun, etc., pancer, Chhanna and Chhanna based sweets – rasogulla; kheer, shrikhand, dahi, kulfietc. |       |  |  |
| 15.            | Factors affecting the microbiological quality in reference to production, processing, storage and distribution; Microbial safety in relation to potential pathogens and their public health significance |       |  |  |
| 16.            | Microbial defects, control measures and legal standards; Active packaging concepts and role in bio-preservation  |       |  |  |

|                | Department of Dan              |                            |                    |

| Course Title:                            | Quality and Safety Monitoring in Dairy Industry | Course No | DM-505 (Theory) |  |
| Course Credit:                           | 3 (2+1)   | Semester  | V (V Dean)      |  |

| Lecture No. | Topics  | Date |  |
|-------------|---|------|--|
| 1.          | Consumer Awareness about Microbiological Quality and Safety of Dairy Foods:                             |      |  |
| 2.          | Changing scenario; Concepts of quality control  |      |  |
| 3.          | Quality assurance and food safety   |      |  |
| 4.          | Global quality and food safety standards  |      |  |
| 5.          | Global quality and food safety standards  |      |  |
| 6.          | Integrated food law, its main features and functions  |      |  |
| 7.          | Introduction to FoodSafety Management System  |      |  |
| 8.          | Concepts of Quality Management System (QMS)–ISO: 9000:2000  |      |  |
| 9.          | Principles of QMS; Standard requirements for QMS  |      |  |
| 10.         | HACCP concept and principle with special reference to biological hazards in                             |      |  |
| 10.         |   |      |  |
| 11          | dairy foods   |      |  |
| 11.         | TQM tools and techniques  |      |  |
| 12.         | Microbiological RiskAnalysis Concepts:Risk assessment, risk management                                  |      |  |
|             | and risk communication  |      |  |
| 13.         | Risk profiling of dairy products  |      |  |
| 14.         | Microbiological criteria and two and three class sampling plan / guidelines                             |      |  |
| 15.         | Bio-safety concepts in handling of dairy pathogens and setting up of a                                  |      |  |
| 100-11      | microbiological/ pathogen lab in a dairy plant  |      |  |
| 16.         | Bio-safety concepts in handling of dairy pathogens and setting up of a                                  |      |  |
|             | microbiological/ pathogen lab in a dairy plant  |      |  |
| 17.         | Rapid Enumeration Techniques: Enumeration principles  |      |  |
| 18.         | Procedure for rapid detection of predominant hygiene indicator organisms                                |      |  |
| 1982        | and pathogens like E. coli (E. coli 0157:H7)  |      |  |
| 19.         | Procedure for rapid detection of predominant hygiene indicator organisms                                |      |  |
| 400         | and pathogens like Salmonella, Shigella and Listeria monocytogenes                                      |      |  |
| 20.         | Procedure for rapid detection of predominant hygiene indicator organisms                                |      |  |
|             | and pathogens like Salmonella, Shigellaand Listeria monocytogenes                                       |      |  |
| 21.         | Procedure for rapid detection of predominant hygiene indicator organisms                                |      |  |
|             | and pathogens likeStaphylococcus aureus   |      |  |
| 22.         | Procedure for rapid detection of predominant hygiene indicator organisms                                |      |  |
|             | and pathogens likeStaphylococcus aureus   |      |  |
| 23.         | Role of Biosensors for monitoring hygiene and safety of dairy food                                      | - Y  |  |
| 24.         | Detection of antibiotic residues in milk –Delvo SP, MDR test  |      |  |
| 25.         | Detection of antibiotic residues in milk-penzyme test, charm assay, lateral                             |      |  |
| 20.         | flow assay (ROSA test) etc  |      |  |
| 26.         | Detection of aflatoxins, pesticides other inhibitors etc. and their public health                       |      |  |
| 20.         | importance in dairy food  |      |  |
| 27.         | Plant and equipment hygiene:Concepts of hygiene and sanitation  |      |  |
|             |   |      |  |
| 28.         | Microbial quality of water and environmental hygiene in dairy plant, chlorination of dairy water supply |      |  |
| 29.         | Microbial quality of water and environmental hygiene in dairy plant,                                    |      |  |
|             | chlorination of dairy water supply  |      |  |
| 30.         |   |      |  |
| 31.         | Treatment and disposal of waste water and effluents   |      |  |
| 32.         | Treatment and disposal of waste water and effluents   |      |  |

| Practical No. | Topics   | Date |
|---------------|--|------|
| 1.            | Rapid detection of Coliform, E. coli, Enterococci, Enterobacteriacae count using D- count and 3M Petrifilm kits  |      |
| 2.            | Rapid detection of Coliform, E. coli, Enterococci, Enterobacteriacae count using D- count and 3M Petrifilm kits  |      |
| 3.            | Rapid detection of pathogenic bacteria based on antigen antibody principle:Staphylococcal enterotoxins   |      |
| 4.            | Rapid detection of pathogenic bacteriaE. coli O157:H7  |      |
| 5.            | Rapid detection of pathogenic bacteriaListeria monocytogenes   |      |
| 6.            | Rapid detection of pathogenic bacteriaSalmonella   |      |
| 7.            | Microbiological tests for assessing Environmental, equipment and personnel hygiene by swab method  |      |
| 8.            | Microbiological tests for assessing Environmental, equipment and   |      |
| 9.            | Rapid detection of antibiotic residues in milk using Delvo SP, MDR test  |      |
| 10.           | Rapid detection of antibiotic residues in milk usingCharm assay, Lateral flow assay (ROSA test).   |      |
| 11.           | Rapid detection of aflatoxin M1/ pesticides residues in milk usingCharm Assay, Lateral Flow Assay (ROSA test) / Enzyme Inhibition Assay using Luminometer. |      |
| 12.           | Rapid detection of aflatoxin M1/ pesticides residues in milk using Charm Assay, Lateral Flow Assay (ROSA test) / Enzyme Inhibition Assay asing Luminometer |      |
| 13.           | Evaluation of common sanitizing agents used in dairy plants by   |      |
| 14.           | Evaluation of common sanitizing agents used in dairy plants by capacity test   |      |
| 15.           | Determination of BOD in dairy waste water.   |      |
| 16.           | Quality evaluation by HACCP in the preparation of dairy products   |      |

| gested Readings   |       |
|---|-------|
| Dairy Microbiology –K.C. Mahanta  |       |
| Dairy Bacteriology - Hammer   |       |
| Fundamentals of Dairy Microbiology - J.B. Prajapati                     |       |
| Comprehensive Dairy Microbiology - Yaday, Batish and Grover             |       |
| Chemical & Microbiological Analysis of Milk & milk products-Ramakant Sh | arma. |
| Dairy Microbiology Handbook (I,II & III edition)- Richard K. Robinson   |       |
| Dairy Microbiology – H. A. Modi   |       |
| Standard Methods for the Examination of Dairy Products- Marshall RT.    |       |

|------------------------------|-------------------------------------|-----------|-----------------|
| Course Title:                | Food and Industrial of Microbiology | Course No | DM-606 (Theory) |
| Course Credit:               | 3 (2+1)                             | Semester  | VI (V Dean)     |

| Lecture<br>No. | Topics  | Date       |
|----------------|---|------------|
| 1.             | Basic aspects and scope of food microbiology  | 2          |
| 2.             | Intrinsic factors that affect microbial growth in foods   |            |
| 3.             | Extrinsic factors that affect microbial growth in foods   |            |
| 4.             | Microbial spoilage of fruits  |            |
| 5.             | Microbial spoilage of fruit juices  |            |
| 6.             | Microbial spoilage of vegetables  | Total Inc. |
| 7.             | Microbial spoilage of cereals   | 1000       |
| 8.             | Microbial spoilage of meat  |            |
| 9.             | Microbial spoilage of poultry   |            |
| 10.            | Microbial spoilage of sea foods   |            |
| 11.            | Microbial spoilage of carbonated soft drinks  |            |
| 12.            | Microbial spoilage of canned foods  |            |
| 13.            | Food preservation by physical methods   |            |
| 14.            | Food preservation by chemical preservatives   |            |
| 15.            | Food preservation by natural antimicrobial compounds and  |            |
| 16.            | Biology based preservation system   |            |
| 17.            | Fermentation: History and Scope   |            |
| 18.            | Fermentation processes: the range and components  |            |
| 19.            | Fermentation processes: types (submerged, surface and solid state fermentation)                 |            |
| 20.            | Criteria for selection of industrially important microorganism                                  |            |
| 21.            | Media for industrial and inoculums development  |            |
| 22.            | Up stream and down stream processing of fermented products.                                     |            |
| 23.            | Fermenters: types   |            |
| 24.            | Fermenters: functionsl  |            |
| 25.            | Fermenters: design and control  |            |
| 26.            | Chemostat and turbidostat.  |            |
| 27.            | Microorganism and processes involved in the production of industrial alcohol                    |            |
| 28.            | Microorganism and processes involved in the production of organic acids (citric lactic)         |            |
| 29.            | Microorganism and processes involved in the production of enzymes (protease, lipase and rennet) | 2072       |
| 30.            | Microorganism and processes involved in the production of vitamin (B-12)                        |            |
| 31.            | Microorganism and processes involved in the production of antibiotic (nisin)                    | -          |
| 32.            | Microbiology of effluent treatment in food industry   |            |

|                | Department of Daily W               |                          |                    |

| Course Title:  | Food and Industrial of Microbiology | Course No                | DM-606 (Practical) |
| Course Credit: | 3 (2+1)                             | Semester                 | VI (V Dean)        |

| Practical No. | Topics  | Date |
|---------------|---|------|
| 1.            | Microbiological examination of fresh fruits                                 |      |
| 2.            | Microbiological examination of fresh vegetables                             |      |
| 3.            | Microbiological examination of wheat flour and bread                        |      |
| 4.            | Microbiological examination of skim milk powder                             |      |
| 5.            | Evaluation of MBRT of raw and pasteurized milk                              |      |
| 6.            | Microbiological examination of fruit juice                                  |      |
| 7.            | Microbiological examination of fruit pulp                                   |      |
| 8.            | Design and control of a tabletop and 10 liter lab fermenter (Demonstration) |      |
| 9.            | Production of microbial biomass   |      |
| 10.           | Production of ethyl alcohol from molasses and whey by yeasts                |      |
| 11.           | Production of lactic acid from whey   |      |
| 12.           | Isolation of psychrophile microorganisms from foods                         |      |
| 13.           | Isolation salt and sugar tolerant microorganisms from foods                 |      |
| 14.           | Isolation of industrially important microorganisms from environment         |      |
| 15.           | Production and assaying of microbial enzymes (protease/ lipase)             |      |
| 16.           | Production of nisin and assaying the antimicrobial activity of the culture  |      |

Department Of Dairy Business Management

| TEACHING SCHEDULE (Vth Dean) |  |            |                     |  |
|------------------------------|--|------------|---------------------|--|
| Course Title:                | Milk Production Management & Dairy Development | Course No. | DBM-101<br>(Theory) |  |
| Course Credit:               | 3(2+1)   | Semester   | I (V Dean)          |  |

| Lecture No. | Topics   | Date   |
|-------------|--|--------|
| 1.          | Introduction to Animal husbandry                                       |        |
| 2.          | Scope & importance of Animal Husbundary.                               |        |
| 3.          | Distinguish characteristics of Indian and exotic breeds.               |        |
| 4.          | Different systems of breeding  |        |
| 5.          | Selection of dairy animals for breeding.                               |        |
| 6.          | General farm practices: Dehorning and Castration, identification etc.  |        |
| 7.          | General farm practices: Grooming & Weighing                            |        |
| 8.          | Care of animal at calving and management of neonates.                  |        |
| 9.          | Management of lactating and dry cow and Buffalo.                       |        |
| 10.         | Milking: Methods, Procedure and practice for quality milk production.  |        |
| 11.         | Machine Milking for clean milk production                              |        |
| 12.         | Dairy farm records and their maintenance                               | Ш      |
| 13.         | Housing system of Animal: Importance and hygiene and sanitation etc.   |        |
| 14.         | Selection of site for housing of animals                               |        |
| 15.         | Common disease: Diagnosis, Prevention and control                      |        |
| 16.         | Feed nutrient required by the animal, Sources of feed stuff.           |        |
| 17.         | Sources of feed: Green, Dry and concentrates                           |        |
| 18.         | Feed resources for milk production and their nutritive values.         |        |
| 19.         | Nutrients requirements for growth and milk production.                 |        |
| 20.         | Digestive system of ruminants.   |        |
| 21.         | Feeding Standard and measurement of feed energy                        |        |
| 22.         | Structure and function of mammary System.                              |        |
| 23.         | Milk Secretion and milk letdown.                                       |        |
| 24.         | Male reproductive System   |        |
| 25.         | Female reproductive System   |        |
| 26.         | Estrus to reproductive cycle.  | 1,000  |
| 27.         | Ovulation, fertilization, gestation, parturition, pregnancy diagnosis. |        |
| 28.         | Artificial insemination: Importance and application.                   |        |
| 29.         | Embryo transfer and their role in Animal improvement.                  |        |
| 30.         | Introduction to bio-techniques in animal production.                   |        |
| 31.         | Post independence development in dairying                              |        |
| 32.         | Operation flood programme  | the gr |

|                | Department of Barry Business Warrage           |            |                        |

|                | TEACHING SCHEDULE (V <sup>th</sup> Dean)       |            |                        |
| Course Title:  | Milk Production Management & Dairy Development | Course No. | DBM-101<br>(Practical) |
| Course Credit: | 3(2+1)   | Semester   | I (V Dean)             |

| Practical No. | Topics  | Date |
|---------------|---|------|
| 1.            | Handling and restraining of dairy animals                                 |      |
| 2.            | External Body parts and judging of Dairy Cows and Buffalos                |      |
| 3.            | Feeding and Management practices of calves.                               |      |
| 4.            | Identification of common feeds and fodder.                                |      |
| 5.            | Estimation of balance ration  |      |
| 6.            | Demonstration on preparation of silage                                    |      |
| 7.            | Preparation of ration for adult animals.                                  |      |
| 8.            | Milking of Dairy animals.   |      |
| 9.            | Cleaning and sanitation of milking equipments.                            |      |
| 10.           | Demonstration on machine milking.   |      |
| 11.           | Identification of reproductive organ.                                     |      |
| 12.           | Identification of digestive organ.  |      |
| 13.           | Demonstration of semen collection, processing and artificial insemination |      |
| 14.           | Visit to veterinary clinic  |      |
| 15.           | Visit to dairy Farm   |      |

| Course Title:                | Communication Skills | Course No. | DBM-102    |  |
| Course Credit:               | 2(1+1)               | Semester   | I (V Dean) |  |

# THEORY

| Lecture No. | Topics  | Date |
|-------------|---|------|
| 1           | Communication Process: Scope and importance   |      |
| 2           | Nature and significance of communication process  |      |
| 3           | The magic of effective communication  |      |
| 4           | Building self-esteem and overcoming fears   |      |
| 5           | Meaning, types and models of communication  |      |
| 6           | Verbal and non-verbal communication   |      |
| 7           | Linguistic and non-linguistic barriers to communication   |      |
| 8           | 8 reasons behind communication gap/ miscommunication  |      |
| 9           | 9 Basic Communication Skills: Listening, Speaking, Reading  |      |
| 10          | 10 Basic Communication Skills: Writing Skills; Précis writing   |      |
| 11          | 11 Style of technical communication Curriculum vitaé/resumé   |      |
| 12          | writing; Innovative methods to enhance vocabulary, analogy questions.   |      |
| 13          | 13 Structural and Functional Grammar: Sentence structure, modifiers,  |      |
| 14          | Case: subjective case, possessive case; objective case; Correct usage of nouns, pronouns and antecedents, adjectives, adverbs and articles; |      |
| 15          | Agreement of verb with the subject: tense, mood, voice;   |      |
| 16          | Writing effective sentences; Basic sentence faults  |      |

# PRACTICAL

| Practical No. | Topics  | Date |
|---------------|---|------|
| 1.            | Listening and note taking   |      |
| 2.            | Writing skills  |      |
| 3.            | Reading and comprehension (written and oral) of general and technical |      |
| 4.            | Oral Presentation   |      |
| 5.            | Stage manners: grooming, body language                                |      |
| 6.            | Stage manners: voice modulation, speed;                               |      |
| 7.            | Indexing, Bibliography and footnotes                                  |      |
| 8.            | Micro Presentation  |      |
| 9.            | An impromptu speech/presentation                                      |      |
| 10.           | Feedback on presentation  |      |
| 11            | Public speaking   |      |
| 12.           | Preparation for Group Discussion                                      |      |
| 13.           | Improving vocabulary  |      |
| 14.           | vocabulary building exercises   |      |
| 15.           | improve interview technique   |      |
| 16.           | Organization of events  |      |

| Refere | nces:   |  |
|--------|---|--|
|        | Communication Skill by Malviy and Shukla                    |  |
|        | Communication Skill by Pathak                               |  |
|        | Communication Skill by Ghousia Khatoon and Kamini Dhurva    |  |
|        | Developing Communication Skill by Krishna and Meera Banerii |  |

| TEACHING SCHEDULE (Vth Dean) |  |            |            |
|------------------------------|--|------------|------------|
| Course Title:                | Computer and Application Software Packages | Course No. | DBM-103    |
| Course Credit:               |  | Semester   | I (V Dean) |

### THEORY

| Lecture No. | Topic   | Date |
|-------------|---|------|
| 1.          | Introduction to computers and PCs: History. Features, Classification, |      |
| 2.          | Types & Components of computer, use in organization.                  |      |
| 3.          | I/O devices / peripheral devices for computers                        |      |
| 4.          | Features of modern operating systems                                  |      |
| 5.          | Number Systems with conversion  |      |
| 6.          | Computer coding schemes.  |      |
| 7.          | Introduction to Networking, topology, types                           |      |
| 8.          | Communication system: use, type, working.                             |      |
| 9.          | Internet system: Online surfing making email-ID, composing & mailing  |      |
| 10.         | Word-processing and desktop publishing                                |      |
| 11.         | Electronic spreadsheet basics and operations, Worksheet basics and    |      |
| 12.         | Commands Formulae, Function, Graph and macro.                         |      |
| 13.         | Database Management System: Concept of DBMS, RDBMS                    |      |
| 14.         | Creating, Searching and sorting of Database                           |      |
| 15.         | Fundamentals of Graphic packages for preparation of presentation      |      |
| 16.         | Recent strides in computing.  |      |

#### PRACTICALS

| Practical No.                                       | Topic   | Date |
|---|---|------|
| 1.  | 1. Study of use of PC in Lab, Overview of computers, How to operate PC, |      |
| 2.  | Study of Disk Operating System (DOS)                                    |      |
| 3.  | Introduction to Window Operating System                                 |      |
| 4.  | Features & types of Window Operating System                             |      |
| 5.  | Study of Word processing: Types, Feature, Getting Started with MS-      |      |
| 6.  | Overview of MS- Word: elements, Saving a File                           |      |
| 7.  |   |      |
| 8.  | 8. Spread sheet   |      |
| 9. Solution through Spreadsheet package             |   |      |
| 10. Introduction & Overview DBMS                    |   |      |
| 11.   |   |      |
| 12.   |   |      |
| 13.   | 13. Overview of MS Power Point Presentation                             |      |
| 14. Working with PPT operations, Graph, Table, etc. |   |      |
| 15.   | 15. Working with PPT operations, Graph, Table, etc.                     |      |
| 16.   | Internet Surfing/Email usage  |      |

| TEACHING SCHEDULE (Vth Dean)                           |        |          |            |
|--|--------|----------|------------|
| Course Title: Environmental Studies Course No. DBM-104 |        |          |            |
| Course Credit:   | 2(1+1) | Semester | I (V Dean) |

| Lecture No.   | Topics (Theory)  | Date |
|---|--|------|
| 1   | Introduction about ecosystem   |      |
| 2   | Characteristics and kinds of ecosystem                                 |      |
| 3   | Functions of ecosystem   | ·    |
| 4   | Introduction about Biochemical cycles                                  |      |
| 5   | Water cycle, Nitrogen cycle, Carbon cycle                              |      |
| 6   | Phosphorus cycle, sulphur cycle  |      |
| 7   | Introduction about natural resources                                   |      |
| 8   | Renewable and non-renewable resource                                   |      |
| 9   | 9 Management of natural resources                                      |      |
| 10 Air pollution:- sources. Effects, control measures |  |      |
| 11  | Water pollution, Solid waste pollution, Noise pollution                |      |
| 12  | Soil pollution, Radioactive pollution                                  |      |
| 13  | Food processing industry waste and its management,                     |      |
| 14  | Recycling of factory effluent,   |      |
| 15  | Management of urban waste water, Recycling of organic waste,           |      |
| 16  | Control of environmental pollution, Composting of biological waste and |      |

# PRACTICAL

| Practical No. | Topics (Practical)                               | Date |
|---------------|--|------|
| I F           | Environment and it's analysis                    |      |
| 2             | Determination of water quality parameters        |      |
| 3             | Collection of sample for pollution study.        |      |
| 4             | Determination of PH from water sample            |      |
| 5             | Determination of acidity from water sample       |      |
| 6             | Determination of of alkalinity from water sample |      |
| 7             | Estimation of dissolved oxygen                   |      |
| 8             |  |      |
| 9             | Estimation of COD                                |      |
| 10            | Estimation of Nitrate                            |      |
| 11            | Estimation of Phosphates                         |      |
| 12            | Estimation of pollutant elements                 |      |
| 13            | Estimation of heavy/toxic elements               |      |
| 14            | Estimation of Lead                               |      |
| 15            | Estimation of Lead                               |      |
| 16            | Visit to industrial sewage disposal unit         |      |

| Ecology and Environment by PD Sharma           |

| Course Title:                | Economic Analysis | Course No. | DBM-205     |  |
| Course Credit:               | 2(2+0)            | Semester   | II (V Dean) |  |

| Lecture No. | Topics   | Date |
|-------------|--|------|
| 1           | Introduction to Economics, Basic terminology                   |      |
| 2           | Scope & importance of economics.                               |      |
| 3           | Needs, Wants, Utility and Goods                                |      |
| 4           | Assumptions of cardinal utility analysis of economics.         |      |
| 5           | Concept of micro economics and its application                 |      |
| 6           | Concept of macro economics and its application                 |      |
| 7           | Law of diminishing marginal utility.                           |      |
| 8           | Law of Demand, its type. Demand schedule and demand function.  |      |
| 9           | Practical applications of law of demand.                       |      |
| 10          | Factors affecting/ determinants law of demand.                 |      |
| 11          | Elasticity of demand. Its type.                                |      |
| 12          | Practical importance of elasticity of demand.                  |      |
| 13          | Consumer surplus.  |      |
| 14          | Practical importance of consumer surplus.                      |      |
| 15          | Theory of Production.  |      |
| 16          | Concept of firm & industry.                                    |      |
| 17          | Law of variable proportion,.                                   |      |
| 18          | Increasing return, constant return, decreasing return          |      |
| 19          | Law of return.   |      |
| 20          | Concept of cost, Fixed cost ,Variable cost and Total cost      |      |
| 21          | Short Tern & Long Term Cost                                    |      |
| 22          | Economies & diseconomies of scale.                             |      |
| 23          | Concept of market. Scope & importance of marketing management. |      |
| 24          | Monopoly, Duopoly, Oligopoly                                   |      |
| 25          | Monopolistic competition.                                      |      |
| 26          | Perfect market & imperfect market.                             |      |
| 27          | National income  |      |
| 28          | Different methods of apportioning national income.             |      |
| 29          | GNP, GDP, NNP, Direct income and.                              |      |
| 30          | Personal Income ,disposable income                             |      |
| 31          | Per Capita income  |      |
| 32          | Inflation  |      |

|                | TEACHING SCHEDULE (Vth I                                      | Dean)      |            |
|----------------|---|------------|------------|
| Course Title:  | ICT in Dairy Industry and Introduction to Operations Research | Course No. | DBM-507    |
| Course Credit: | 4(2+2)  | Semester   | V (V Dean) |

| Lecture No. | THEORY Title   | Date |
|-------------|--|------|
| 1.          | Introduction–Elementary concepts, objectives of operations research,                       | Date |
| 2.          | Applications of OR in decision-making.   |      |
| 3.          | Modelling in Operation Research.   |      |
| 4.          | Linear Programming: Introduction, mathematical formulation of the problem,                 |      |
| 5.          | Graphical solution, Simplex technique for solving simple LP problems.                      |      |
| 6.          | Inventory Control – Introduction and general notations,                                    |      |
| 7.          | Economic lot size models with demand.  |      |
| 8.          | Problem solving with EOQ   |      |
| 9.          | Replacement – Introduction, Replacement of items whose efficiency deteriorates with time.  |      |
| 10.         | Queuing – Introduction and general notions,  |      |
| 11.         | Classification of queues and their problems,   |      |
| 12.         | Introduction to Probability problem & their types  |      |
| 13.         | Probability distribution of queues.  |      |
| 14.         | Various models in the queuing system.  |      |
| 15.         | Sequencing – Statement of the problem, notations and assumptions,                          |      |
| 16.         | Types of Sequencing  |      |
| 17.         | Problems with 'n' jobs and two machines.   |      |
| 18.         | Generalization to 'm' machines.  |      |
| 19.         | Transportation model – Definition and application of transportation model,                 |      |
| 20.         | Introduction to types of Transportation model  | 102  |
| 21.         | Formulation of transportation problems and their solutions by NWCM                         |      |
| 22.         | Formulation of transportation problems and their solutions by Least Count Method           |      |
| 23.         | Formulation of transportation problems and their solutions by Vogel's Approximation Method |      |
| 24.         | Introduction to Assignment problems and their types  |      |
| 25.         | Formulation of Assignment problems and their solutions                                     |      |
| 26.         | MODI method  |      |
| 27.         | Introduction & framework of PERT and CPM   |      |
| 28.         | Introduction & concept activities, events and network                                      |      |
| 29.         | Formulation of Network diagram   |      |
| 30.         | PERT and activity time estimates,  |      |
| 31.         | Probability of project completion  |      |
| 32.         | Formulation and solution of Critical path method   |      |

|                | TEACHING SCHEDULE (Vth I                                      | Dean)      |            |
|----------------|---|------------|------------|
| Course Title:  | ICT in Dairy Industry and Introduction to Operations Research | Course No. | DBM-507    |
| Course Credit: |   | Semester   | V (V Dean) |

### **PRACTICALS**

| Practical No. | Title  | Date |
|---------------|--|------|
| 1 & 2         | Formulation of Linear Programming by simplex technique     |      |
| 3 & 4         | Formulation of Linear Programming by graphical method      |      |
| 5 & 6         | Inventory Control problems                                 |      |
| 7             | Replacement model problems                                 |      |
| 8             | Formulation of Assignment Problems by Hungarian Method     |      |
| 9             | Formulation of transportation problems                     |      |
| 10            | Problems and their solutions by queuing theory             |      |
| 11            | Problems and their solutions by sequencing problem         |      |
| 12            | Problems and their solutions by Replacement model problems |      |
| 13            | Introduction & framework of PERT and CPM                   | Y. A |
| 14            | Scheduling a project with PERT/CPM                         |      |
| 15 & 16       | Formulation and solution of Critical path method           |      |
| 15 & 16       | Formulation and solution of Critical path method           |      |

#### THEORY

| Lecture No. | Topics  | Date |
|-------------|---|------|
| 1           | Introduction to Financial Management: Definition, scope and   |      |
| 2           | Different Systems of Accounting: Financial Accounting, Cost accounting, Management Accounting.  |      |
| 3           | Doubles entry system of Book-Keeping.   |      |
| 4           | Preparation of Accounting Records: Journal, Purchases and Sales Book  |      |
| 5           | Preparation of Final Accounts and adjustments at the end  |      |
| 6           | Preparation of Trial Balance Banking Transactions and Bank reconciliation   |      |
| 7           | Statements of Financial Information   |      |
| 8           | Accounting system: A source of financial statements, Classification of  |      |
| 9           | Balance Sheet, Profit and Loss Account, Statement of changes in the   |      |
| 10          | funds flow statements, cash flow statement, uses of funds flow and cash flow statements in financial decision making                                |      |
| 11          | Nature and uses of financial analysis, Liquidity ratios, Leverage ratios, activity ratios, Utility of Ratio analysis ratios, Profitability activity |      |
| 12          | Cost Volume – Profit analysis and operating leverage, Break-even analysis, Profit analysis and operating analysis, Utility of CVP                   |      |
| 13          | Capital Structure: C.S Planning, risk return trade off, financial leverage  |      |
| 14          | Management of cost of capital, cost of debt, debentures, preference share   |      |
| 15          | equity share capital & retained carnings, overall cost of capital   |      |
| 16          | Time value of money, Net present value, Investment evaluation   |      |
| 17          | NPV method, Internal rate of return method, Profitability index method, Payback period, Accounting rate of return method.                           | 53   |
| 18          | Capital budgeting: Complex investment decisions, Investment timing & duration Investment decisions under  |      |
| 19          | Feasibility Report Valuation. Working capital management-   |      |
| 20          | Depreciation - Concept and method. Introduction, Definition, Objectives,  |      |
| 21          | Essentials of sound costing system. Different methods of costing,   |      |
| 22          | elements of cost: Labour- recording of time, idle time, methods of  |      |
| 23          | Premium & Bonus Plans, Materials, Overheads   |      |
| 24          | Direct and Indirect expenses, fixed and variable costs  |      |
| 25          | Various methods of apportioning indirect expenses   |      |
| 26          | Inventory Management: Planning, control and costing   |      |
| 27          | Stores & storekeeping, scope & importance   |      |
| 28          | purchase procedure, types of purchase, location of stores   |      |
| 29          | different methods of pricing materials, store records   |      |
| 30          | Cost Sheets-Different methods, Statement of cost and statement of profit  |      |
| 31          | Contract or Terminal costing. Process Costing: Process losses and inter   |      |
| 32          | Ascertainment of cost of milk production, Preparation of Cost Account   |      |

|----------------|-------------------------|-------------|-------|----------|------------|---------------|
| Course Title:  | Financial<br>Accounting | Management  | and   |          | Course No. | DBM-810       |
| Course Credit: | 3(2+1)                  |             |       |          | Semester   | VIII (V Dean) |

### PRACTICAL

| Lecture No. | Topics   | Date |
|-------------|--|------|
| 1.          | Preparation of Profit and Loss account Part I  |      |
| 2.          | Preparation of Profit and Loss account Part II |      |
| 3.          | Preparation of Balance Sheet Part I            |      |
| 4.          | Preparation of Balance Sheet Part II           |      |
| 5.          | Preparation of Cash flow statements            |      |
| 6.          | Preparation of Funds flow statements           |      |
| 7.          | Problems on Ratio analysis Part I              |      |
| 8.          | Problems on Ratio analysis Part II             |      |
| 9.          | Problems on Break-Even Analysis Part I         |      |
| 10.         | Problems on Break-Even Analysis Part II        |      |
| 11.         | Problems on Profit analysis                    |      |
| 12.         | Problems on Operating Analysis                 |      |
| 13.         | Problems on Financial leverage                 |      |
| 14.         | Problems on Cost of Capital                    |      |
| 15.         | Problems on Investment decisions               |      |
| 16.         | Problems on Capital budgeting                  |      |

### THEORY

| Lecture No. | Title   | Date |
|-------------|---|------|
| 1           | Definition and scope; sources of animal husbandry and dairy statistics. |      |
| 2           | Measures of central tendency  |      |
| 3           | Measures of dispersion, Moments, skewness and kurtosis                  |      |
| 4           | Elementary notions of probability, Laws of addition and multiplication  |      |
| 5           | Theoretical frequency distributions:                                    |      |
| 6           | Binomial, Poisson and Normal distribution and their application         |      |
| 7           | Concepts of sampling methods  |      |
| 8           | Introduction to testing of hypotheses,                                  |      |
| 9           | Tests of significance-Z,  |      |
| 10          | t, F tests, and their application in the field of dairying.             |      |
| 11          | Analysis of variance- One-Way and two-way classification.               |      |
| 12          | Simple correlation coefficient and its test of significance,            |      |
| 13          | Linear regression, rank correlation.                                    |      |
| 14          | Basic concepts of statistical quality control,                          |      |
| 15          | Control charts for variables and attributes,                            |      |
| 16          | Fundamental concepts of acceptance sampling plan.                       |      |

# PRACTICALS

| Practical No. | Title  | Date |
|---------------|--|------|
| 1             | Measures of central tendency,                    |      |
| 2             | Measures of dispersion,                          |      |
| 3             | Moments, Skewness and Kurtosis                   |      |
| 4             | Kurtosis   |      |
| 5             | binomial & Poisson distribution                  |      |
| 6             | Fitting of binomial distribution                 |      |
| 7             | Fitting of Poisson distribution                  |      |
| 8             | Application of 'Z' test for one sample problems. |      |
| 9             | Application of 'Z' test for two sample problems. |      |
| 10            | Application of 't' test for one sample problems. |      |
| 11            | Application of 't' test for two sample problems. |      |
| 12            | Application of Chi-square test and F-test.       |      |
| 13            | Correlation                                      |      |
| 14            | Regression                                       |      |
| 15            | Rank correlation coefficient.                    |      |
| 16            | Control chart for variables& attributes          |      |
